S&P 500 market analysis

Data as of 2026-10-31

Abstract

A concise view of the S&P 500 over the last five years: company fundamentals from SEC EDGAR filings and prices and dividends from Yahoo Finance, for the current members outside the Financials and Real Estate sectors. For each measure, the sectors are compared, then every sector's best and worst companies, then the two best and two worst sectors in more detail; a final section puts P/E and value side by side to find companies that are both cheap and rewarding. The full history since 2006, used for back-testing, and the data checks are in the appendix. Companies that left the index are not included, so the results carry survivorship bias; all returns include reinvested dividends and all amounts are in US dollars.

1 Introduction

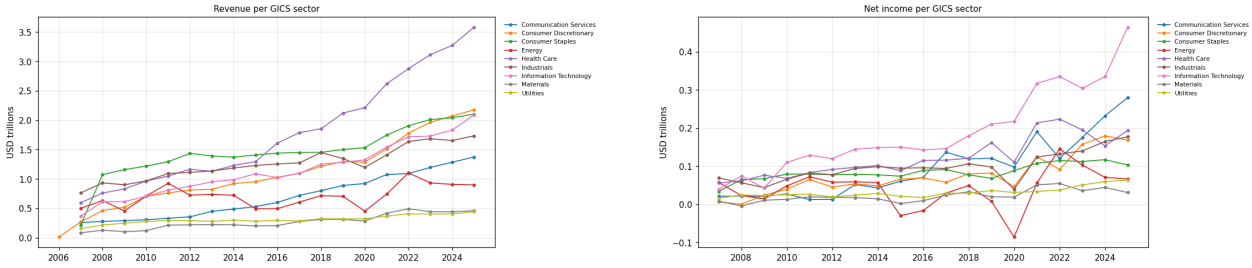

GICS sector	What it covers	Companies	Fund
Communication Services	Telecommunication carriers, media, entertainment and interactive online platforms.	19	XLC
Consumer Discretionary	Goods and services households buy by choice: cars, retail, hotels, restaurants, leisure.	47	XLY
Consumer Staples	Goods households need regardless of the economy: food, beverages, tobacco, household products.	34	XLP
Energy	Oil, gas and coal: exploration, production, refining, and energy equipment and services.	21	XLE
Health Care	Pharmaceuticals, biotechnology, medical equipment and health-care providers.	60	XLV
Industrials	Capital goods, aerospace and defence, transport, and commercial and professional services.	83	XLI
Information Technology	Software, IT services, hardware, semiconductors and electronic equipment.	75	XLK
Materials	Chemicals, construction materials, containers and packaging, metals and mining.	24	XLB
Utilities	Electric, gas and water utilities and independent power producers.	31	XLU

Companies are grouped by the Global Industry Classification Standard (GICS), which S&P and MSCI use to classify listed companies by their principal business. The report uses the GICS sectors, the top level of the classification; Financials and Real Estate are left out because the balance-sheet rules of value investing do not fit banks, insurers and real-estate trusts. Each sector is compared with its SPDR sector fund, which tracks the S&P 500 sector index and includes dividends, and with the S&P 500 total-return index.

Plots name companies by their ticker; Appendix A gives each company's full name, grouped by sector and sorted by ticker. In plots of companies, solid lines are the best and dashed lines the worst by the measure of the section, and each colour is one company. Rankings in the main text use the last five years, and only companies with prices for the whole five years are ranked.

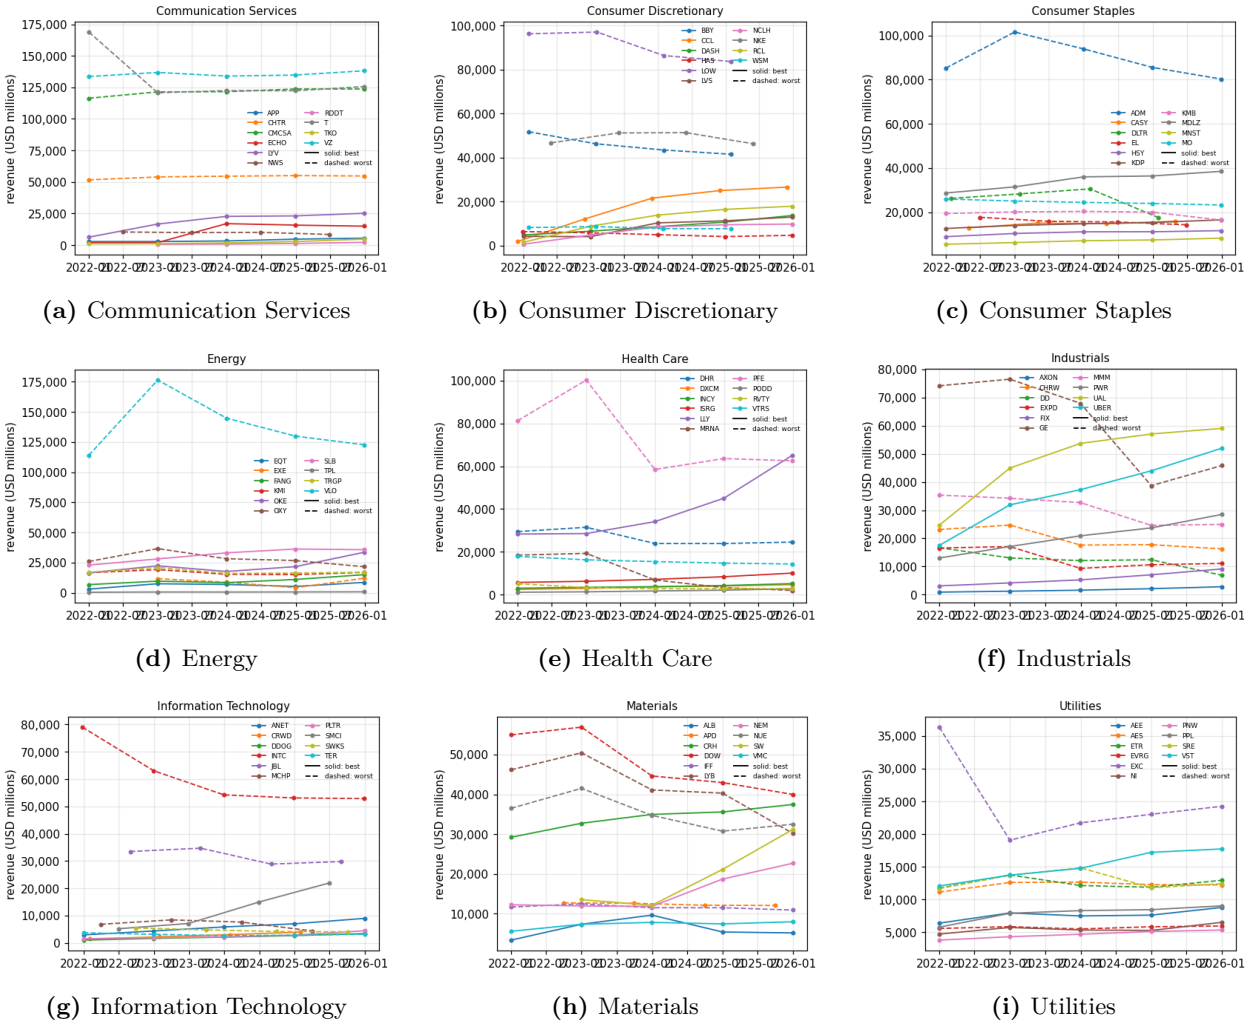

2 Fundamentals: revenue and net income

Revenue and net income are the values first reported in each company's annual report (10-K) to the SEC, in US dollars; later restatements are not used. Sector totals sum the companies of a sector per fiscal year; they move when the number of reporting companies changes, especially before 2009, and the fiscal year of the data date is left out because it is not complete. Companies are ranked by annualised revenue growth over the last 5 years, $g = (V_T/V_0)^{1/Y} - 1$, with V_0 and V_T the first and last annual revenue and Y the years between them; a sector by the median of its companies.

(a) Revenue **(b)** Net income

Figure 1: Sum of first-reported annual (a) revenue and (b) net income over the companies of each GICS sector, USD trillions.

(a) Communication Services **(b)** Consumer Discretionary **(c)** Consumer Staples

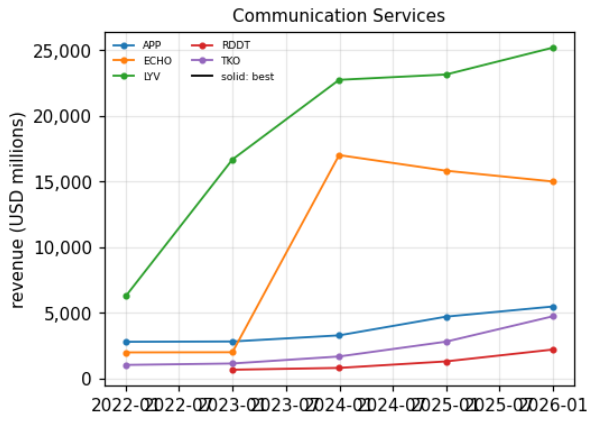

(d) Energy **(e)** Health Care **(f)** Industrials

(g) Information Technology **(h)** Materials **(i)** Utilities

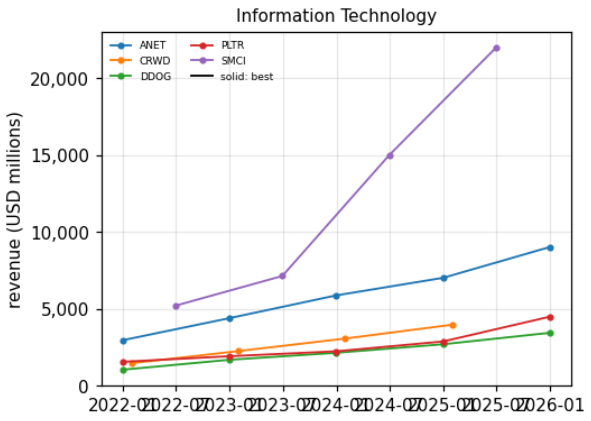

Figure 2: Annual revenue, per GICS sector, of the 5 companies with the highest (solid) and lowest (dashed) revenue growth over the last 5 years; USD millions.

2.1 Overview

Over the last 5 years, Communication Services (11.1% a year median growth) and Information Technology grew revenue fastest, Materials (2.3% a year) and Consumer Staples slowest. The full history of every sector is in Appendix B.

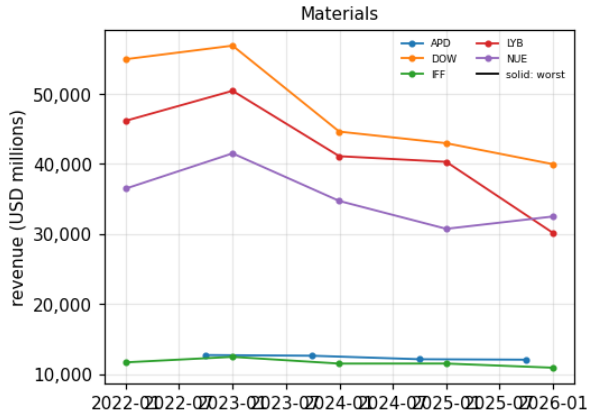

(a) Communication Services

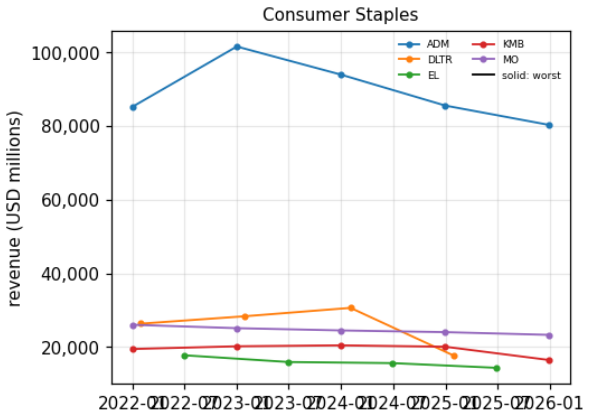

(b) Information Technology

Figure 3: The two sectors with the highest median revenue growth over the last 5 years, (a) Communication Services and (b) Information Technology, with the revenue of their 5 fastest-growing companies; USD millions.

(a) Materials

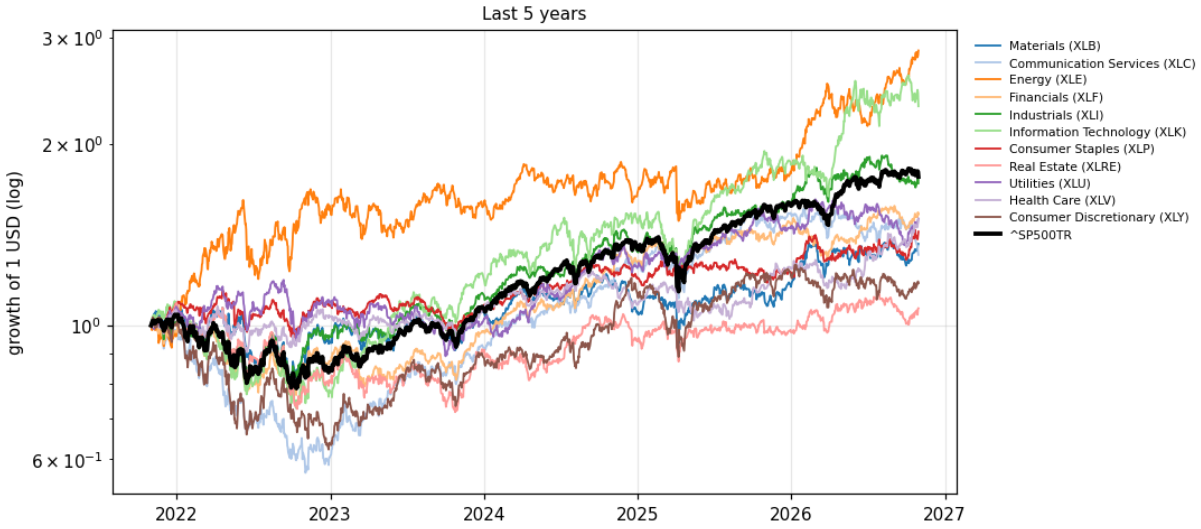

(b) Consumer Staples

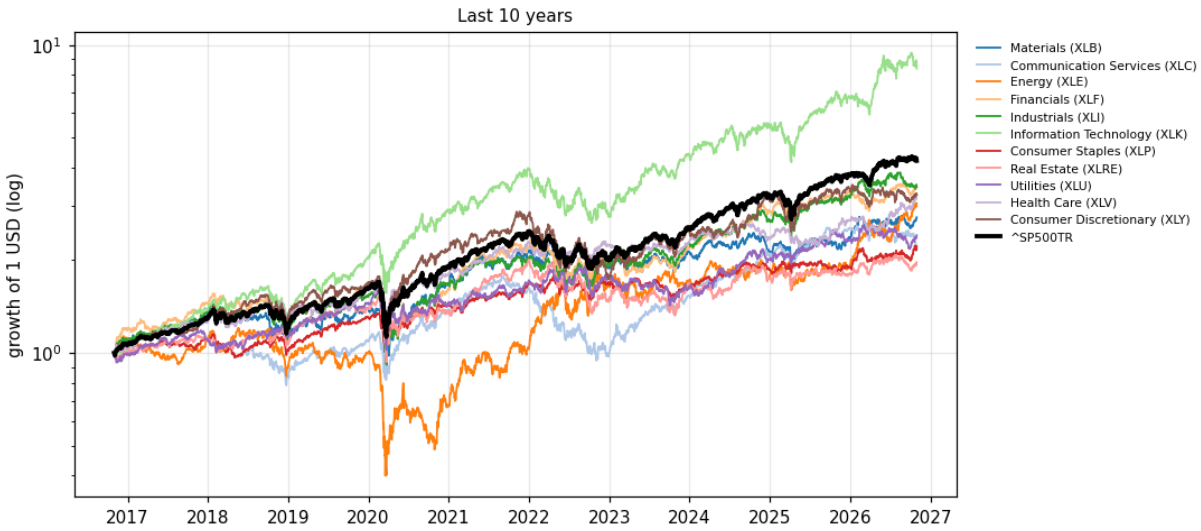

Figure 4: The two sectors with the lowest median revenue growth, (a) Materials and (b) Consumer Staples, with the revenue of their 5 slowest-growing companies; USD millions.

3 Total return

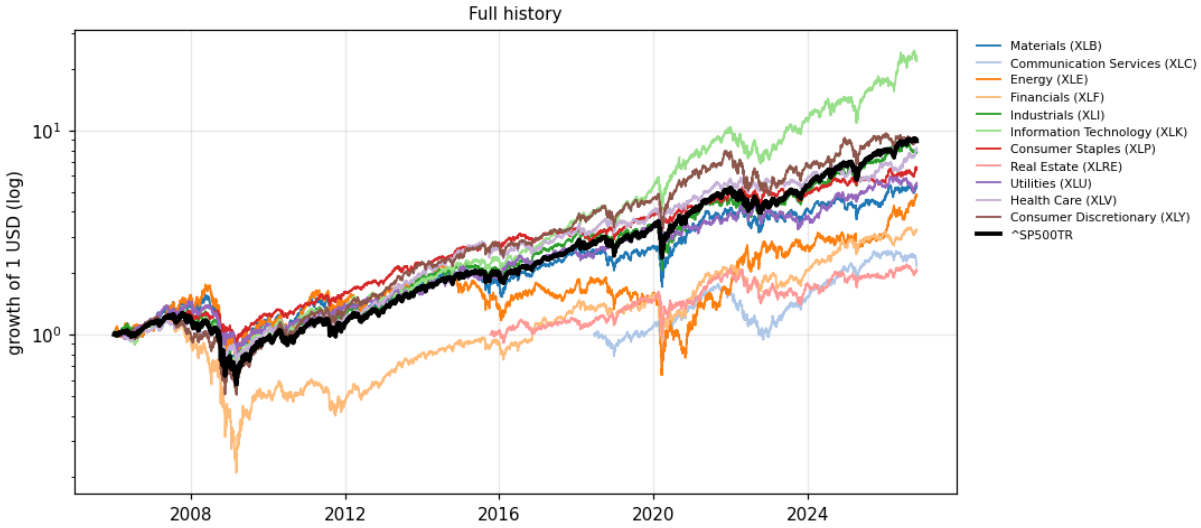

Growth of one US dollar invested with dividends reinvested. Companies are ranked by annualised total return over the last 5 years, $r = (P_T/P_0)^{1/Y} - 1$, with P the dividend-adjusted price; a sector by the return of its fund.

(a) Last 5 years

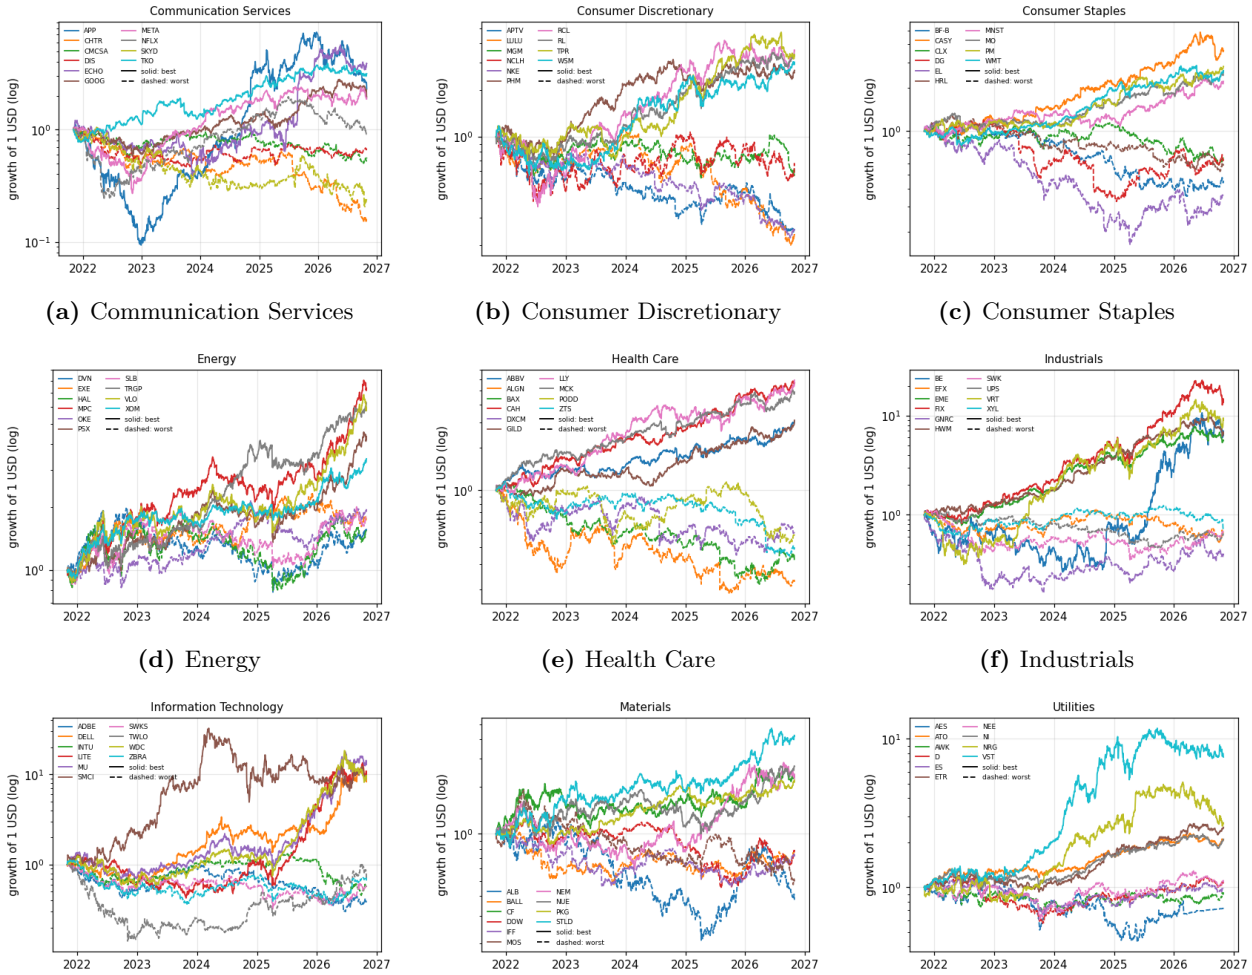

(b) Last 10 years

(c) Full history

Figure 5: Growth of 1 USD with dividends reinvested for each GICS sector fund and the S&P 500 (black), over (a) the last 5 years, (b) the last 10 years and (c) the full history since 2006; each view starts at 1, log scale.

(a) Communication Services **(b)** Consumer Discretionary **(c)** Consumer Staples

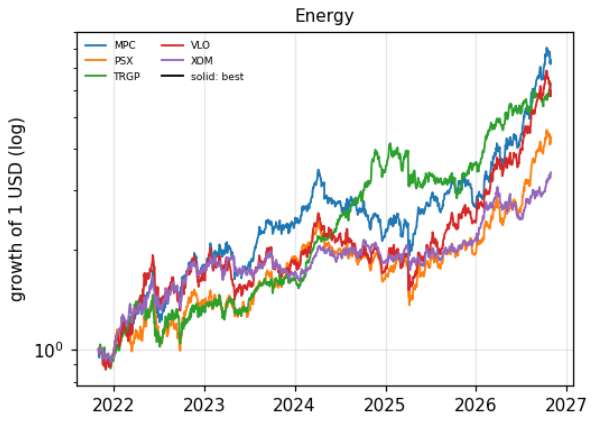

(d) Energy **(e)** Health Care **(f)** Industrials

(g) Information Technology **(h)** Materials **(i)** Utilities

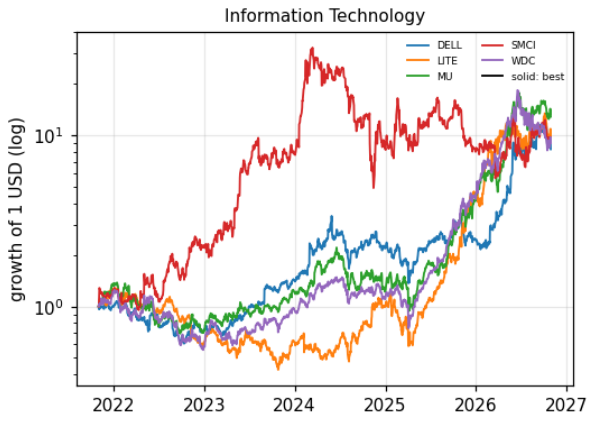

Figure 6: Growth of 1 USD over the last 5 years, per GICS sector, for the 5 companies with the highest (solid) and lowest (dashed) total return; log scale.

3.1 Overview

Over the last 5 years the funds of Energy (23.4% a year) and Information Technology returned the most, those of Consumer Discretionary (3.3% a year) and Communication Services the least. The full history of every sector is in Appendix C.

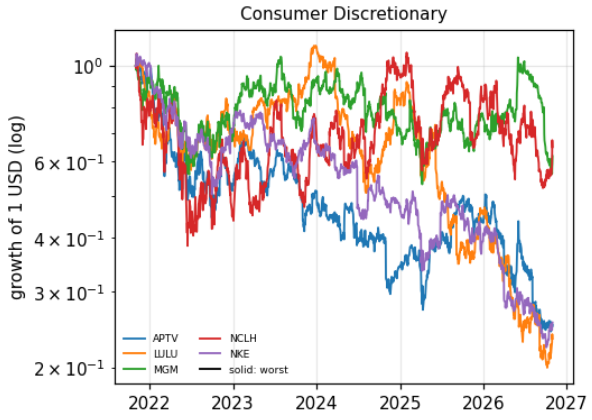

(a) Energy

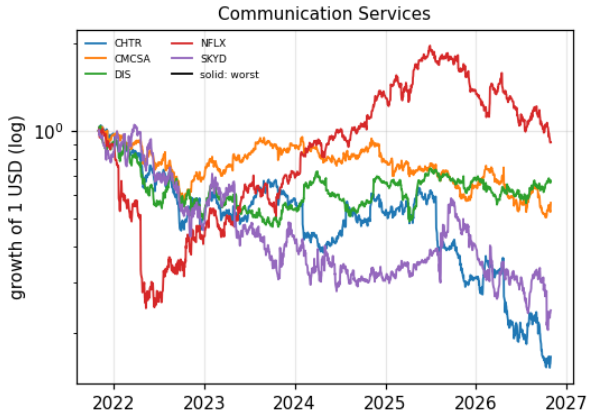

(b) Information Technology

Figure 7: The two sectors whose funds returned the most over the last 5 years, (a) Energy and (b) Information Technology, with growth of 1 USD for their 5 best companies; log scale.

(a) Consumer Discretionary

(b) Communication Services

Figure 8: The two sectors whose funds returned the least, (a) Consumer Discretionary and (b) Communication Services, with growth of 1 USD for their 5 worst companies; log scale.

4 Relative return

A series' growth divided by a benchmark's growth over the same period: above one it beat the benchmark. Sectors are compared with the S&P 500 and companies with their sector fund, so a company's result is its performance within its sector. Ranking uses the annualised relative growth over the last 5 years.

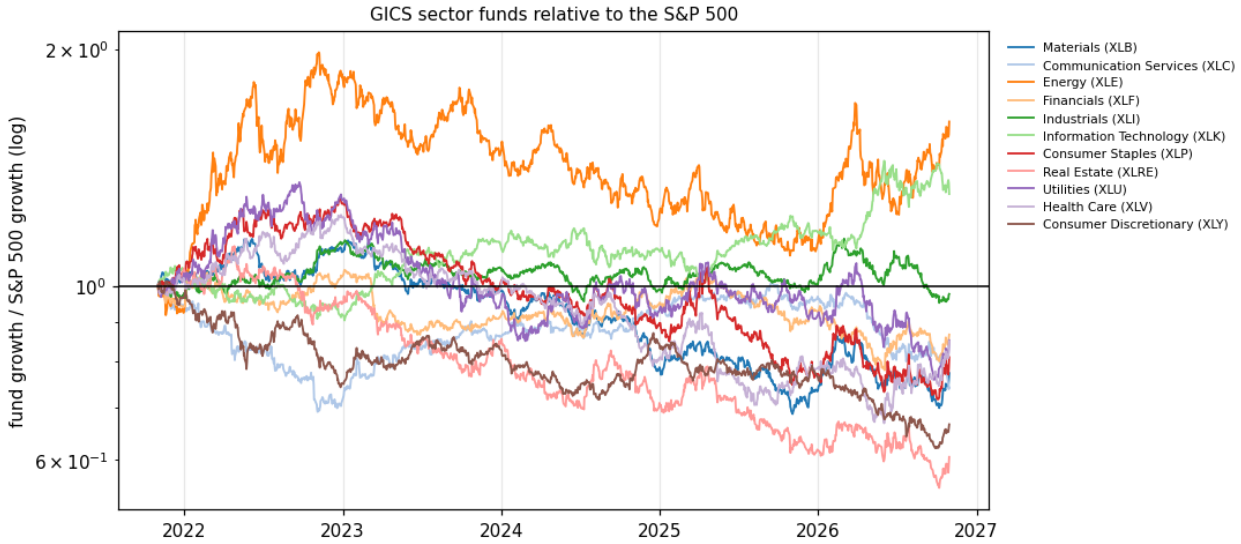

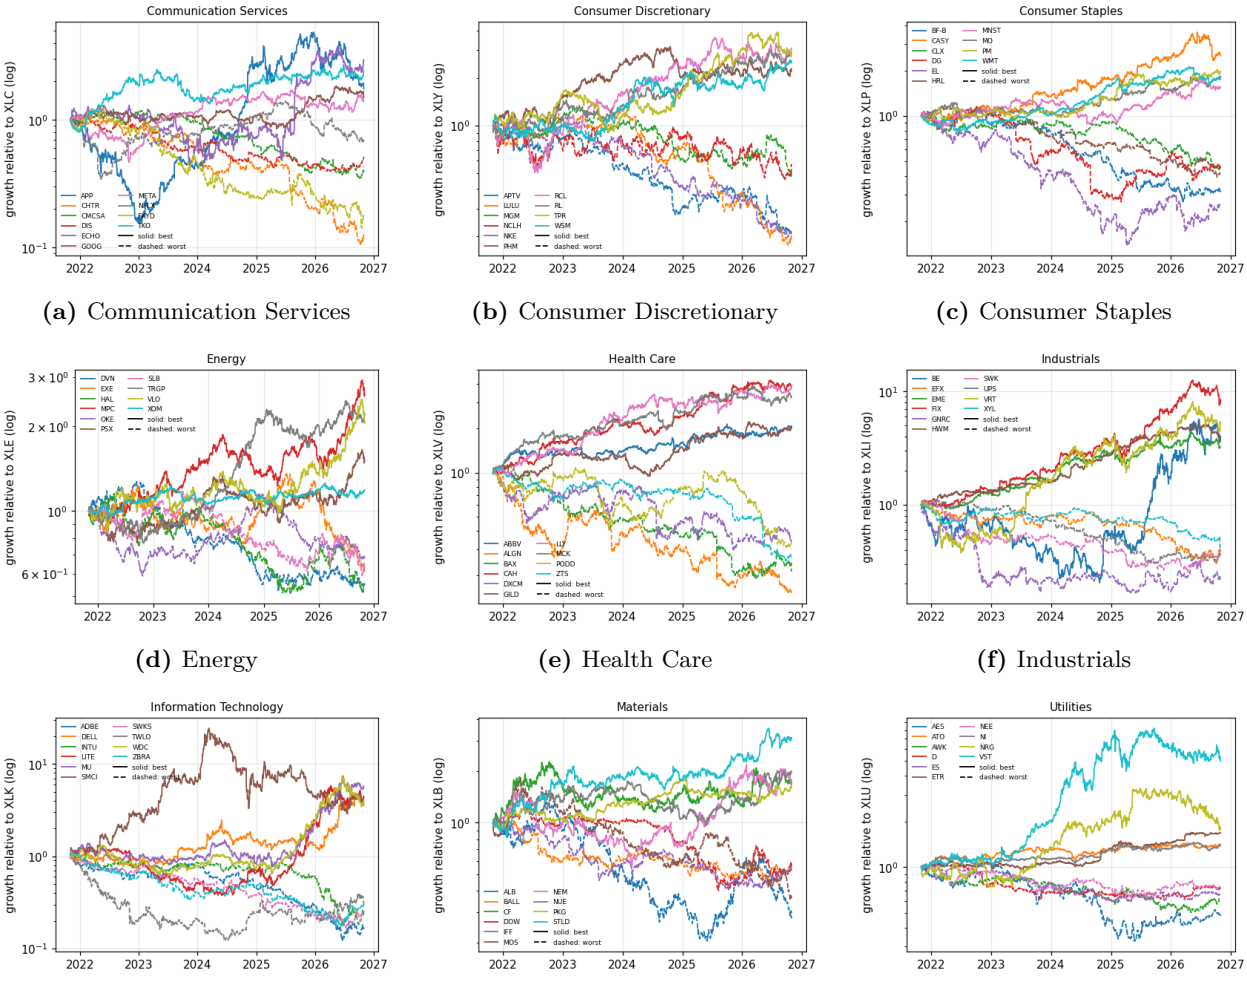

Figure 9: GICS sector funds relative to the S&P 500 over the last 5 years, each starting at 1; above 1 the sector outperformed the market. Log scale.

(a) Communication Services **(b)** Consumer Discretionary **(c)** Consumer Staples

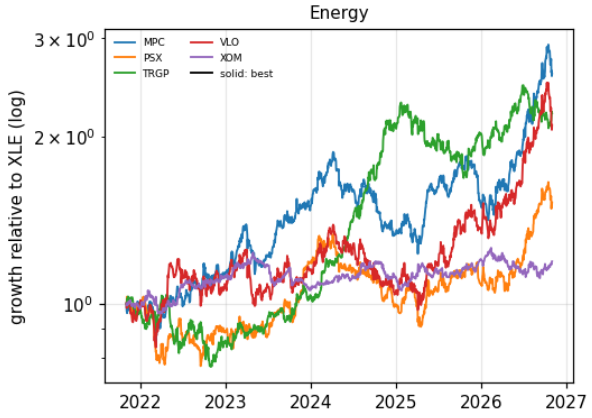

(d) Energy **(e)** Health Care **(f)** Industrials

(g) Information Technology **(h)** Materials **(i)** Utilities

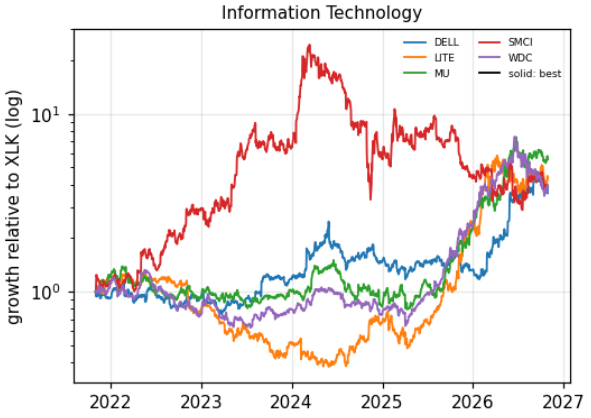

Figure 10: Growth relative to the sector fund over the last 5 years, per GICS sector, for the 5 companies that beat it most (solid) and trailed it most (dashed); log scale.

4.1 Overview

Against the S&P 500, Energy (10.1% a year) and Information Technology did best over the last 5 years, Consumer Discretionary (-7.8% a year) and Communication Services worst. The full history of every sector is in Appendix D.

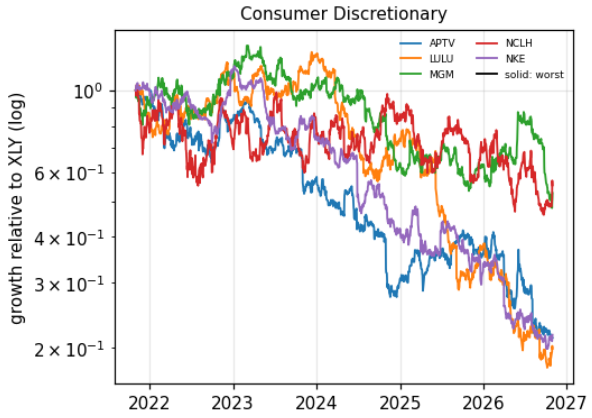

(a) Energy

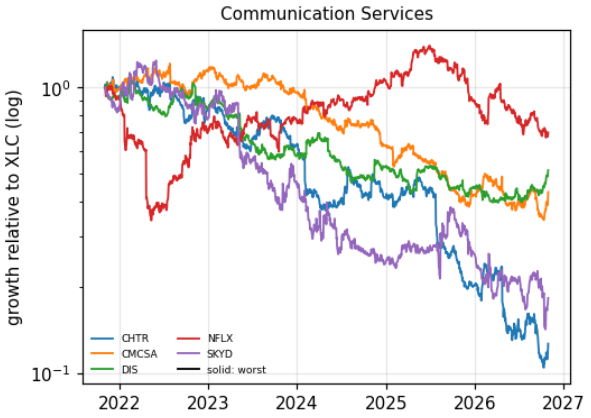

(b) Information Technology

Figure 11: The two sectors that beat the S&P 500 most over the last 5 years, (a) Energy and (b) Information Technology, with their 5 companies that beat their sector fund most; growth relative to the fund, log scale.

(a) Consumer Discretionary

(b) Communication Services

Figure 12: The two sectors that trailed the S&P 500 most, (a) Consumer Discretionary and (b) Communication Services, with their 5 companies that trailed their sector fund most; growth relative to the fund, log scale.

5 Price-to-earnings ratio

The P/E divides the share price by the latest first-reported annual diluted earnings per share filed before the day, with earnings per share on the price's split basis; it changes in steps when a new annual report is filed, and companies with zero or negative earnings have none. A company is ranked by its median P/E over the last 5 years and a sector by the median of its companies; the lowest is best, as value investing looks for cheap earnings. The correlation of P/E and price changes is in Appendix E.

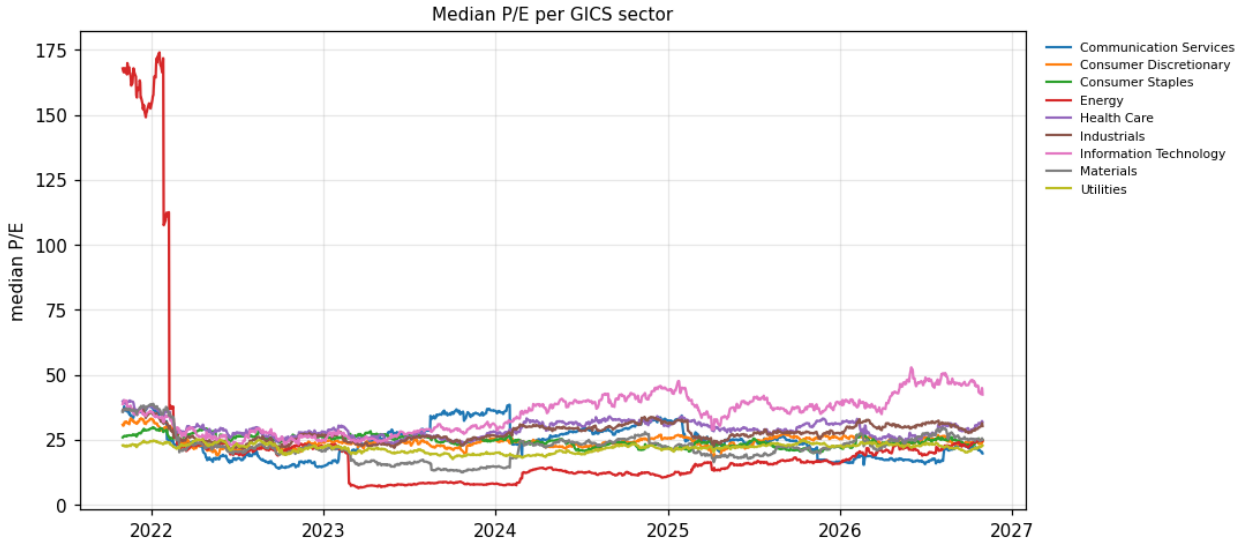

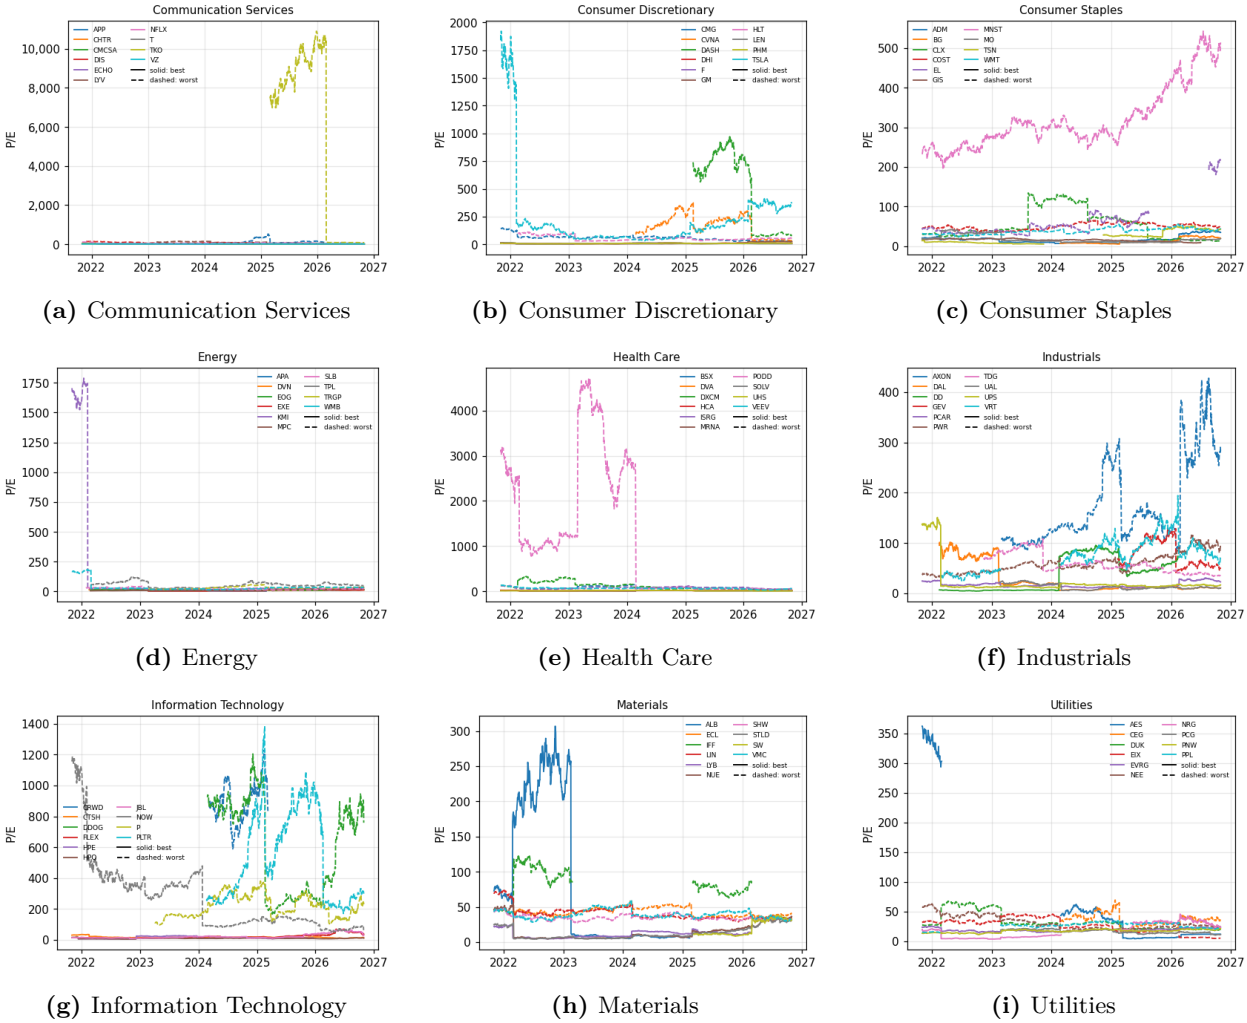

Figure 13: Median P/E of the companies in each GICS sector over the last 5 years.

(a) Communication Services **(b)** Consumer Discretionary **(c)** Consumer Staples

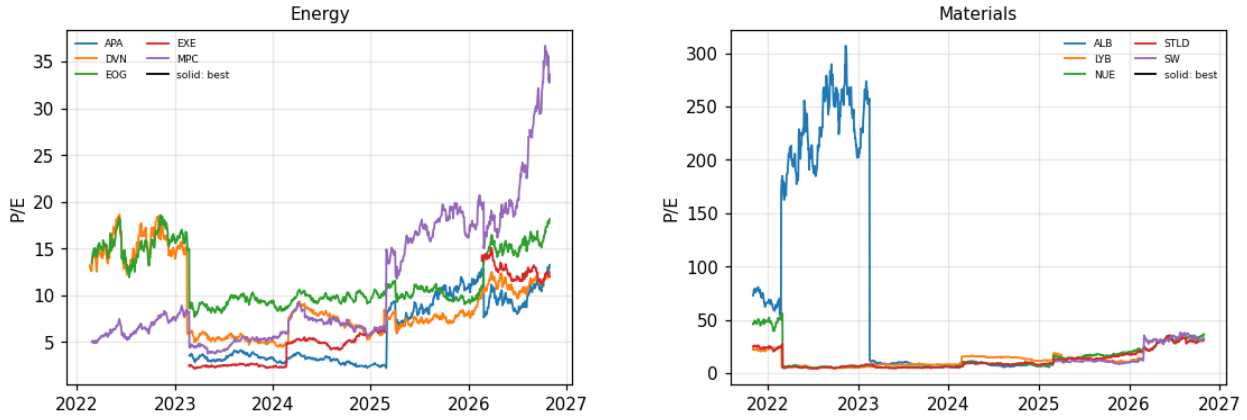

(d) Energy **(e)** Health Care **(f)** Industrials

(g) Information Technology **(h)** Materials **(i)** Utilities

Figure 14: P/E over the last 5 years, per GICS sector, of the 5 companies with the lowest (solid) and highest (dashed) median P/E.

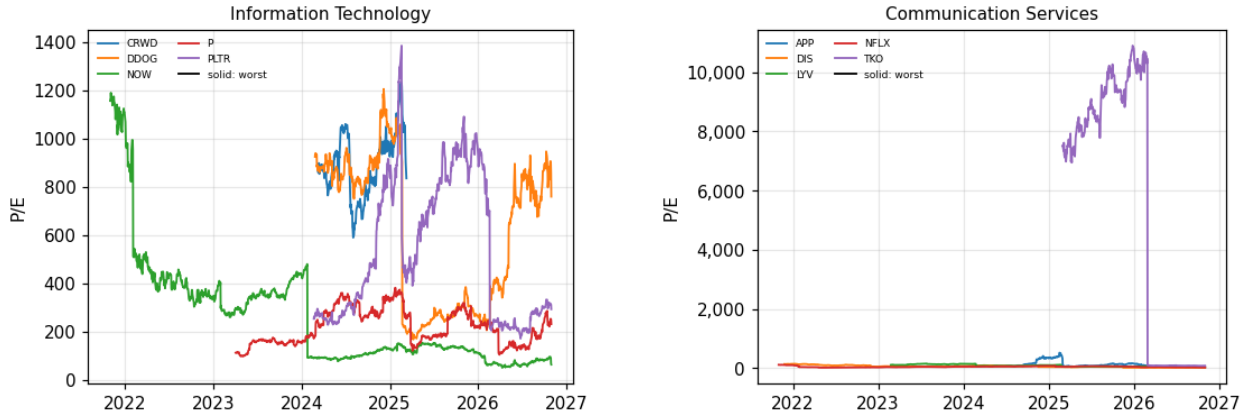

5.1 Overview

Over the last 5 years Energy (15.8) and Materials had the lowest median P/E, Information Technology (32.7) and Communication Services the highest. The full history of every sector is in Appendix E.

(a) Energy **(b)** Materials

Figure 15: The two sectors with the lowest median P/E over the last 5 years, (a) Energy and (b) Materials, with the P/E of their 5 cheapest companies.

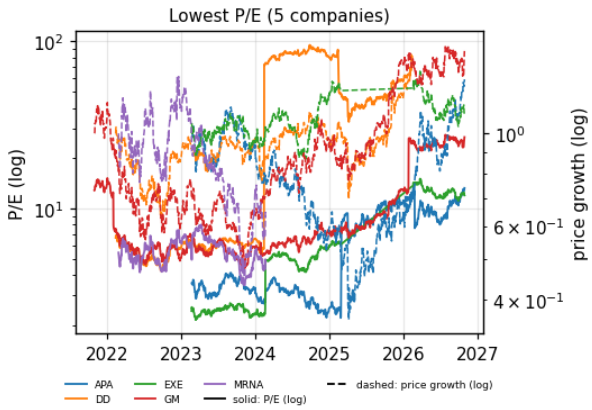

(a) Information Technology **(b)** Communication Services

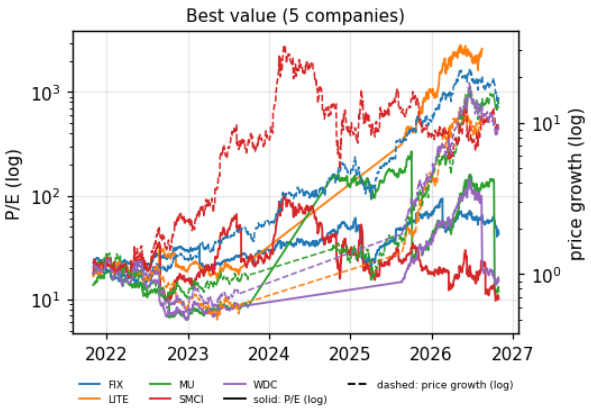

Figure 16: The two sectors with the highest median P/E, (a) Information Technology and (b) Communication Services, with the P/E of their 5 most expensive companies.

6 P/E and value

Value investing looks for companies that are cheap on earnings and still reward their holders. Across all companies, those with the lowest median P/E over the last 5 years are set beside those with the highest total return over the same years, and likewise for the highest P/E and the lowest return; every plot shows both measures for each company. Companies in both best lists: none. Companies in both worst lists: none. Finding such overlap is what the models aim for.

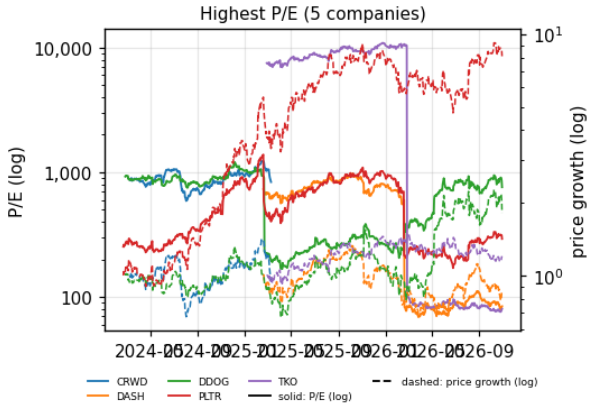

(a) Lowest P/E (5 companies)

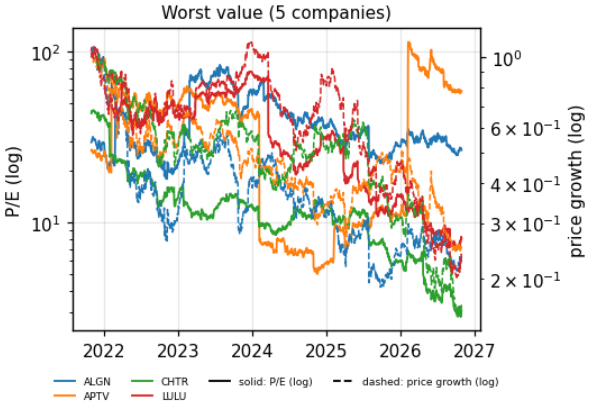

(b) Best value (5 companies)

Figure 17: (a) The 5 companies with the lowest median P/E over the last 5 years (APA, EXE, MRNA, GM, DD) and (b) the 5 with the highest total return (FIX, MU, LITE, SMCI, WDC); for each company its P/E (solid, left axis) and price growth since the start of the window (dashed, right axis), log scales.

(a) Highest P/E (5 companies)

(b) Worst value (5 companies)

Figure 18: (a) The 5 companies with the highest median P/E over the last 5 years (TKO, CRWD, DDOG, DASH, PLTR) and (b) the 5 with the lowest total return (CHTR, ALGN, LULU, SKYD, APTV); P/E (solid, left axis) and price growth (dashed, right axis), log scales.

7 Dividend yield

The trailing dividend yield is the sum of a company's dividends with an ex-date in the past twelve months divided by its share price, both on the same split basis, in percent; a company that paid no dividend in the window yields zero. A company is ranked by its mean yield over the last 5 years and a sector by the median of its companies; the highest is best.

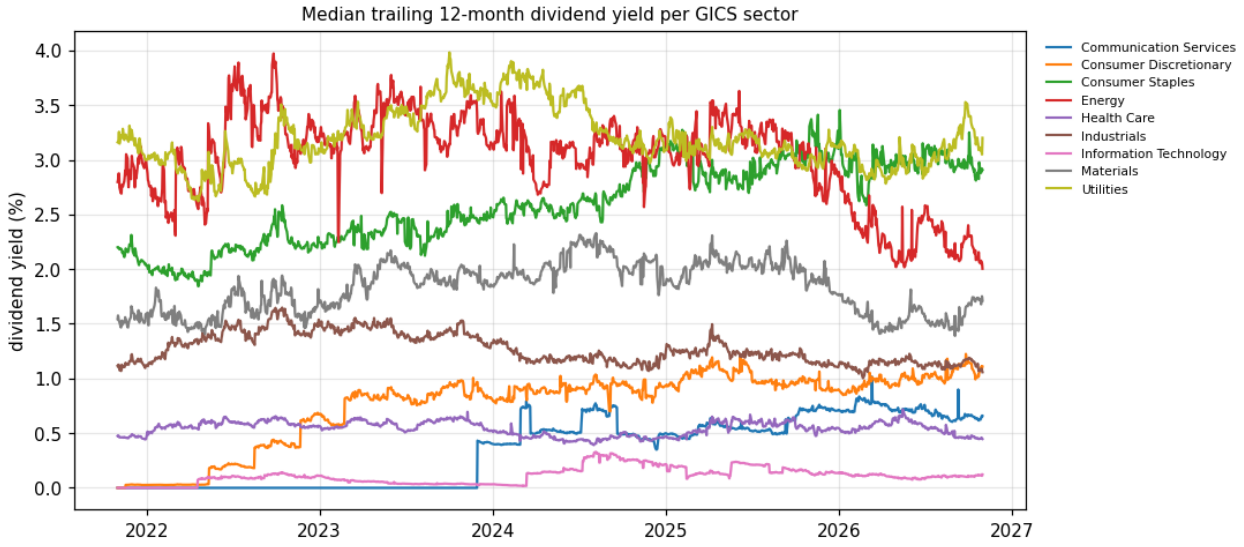

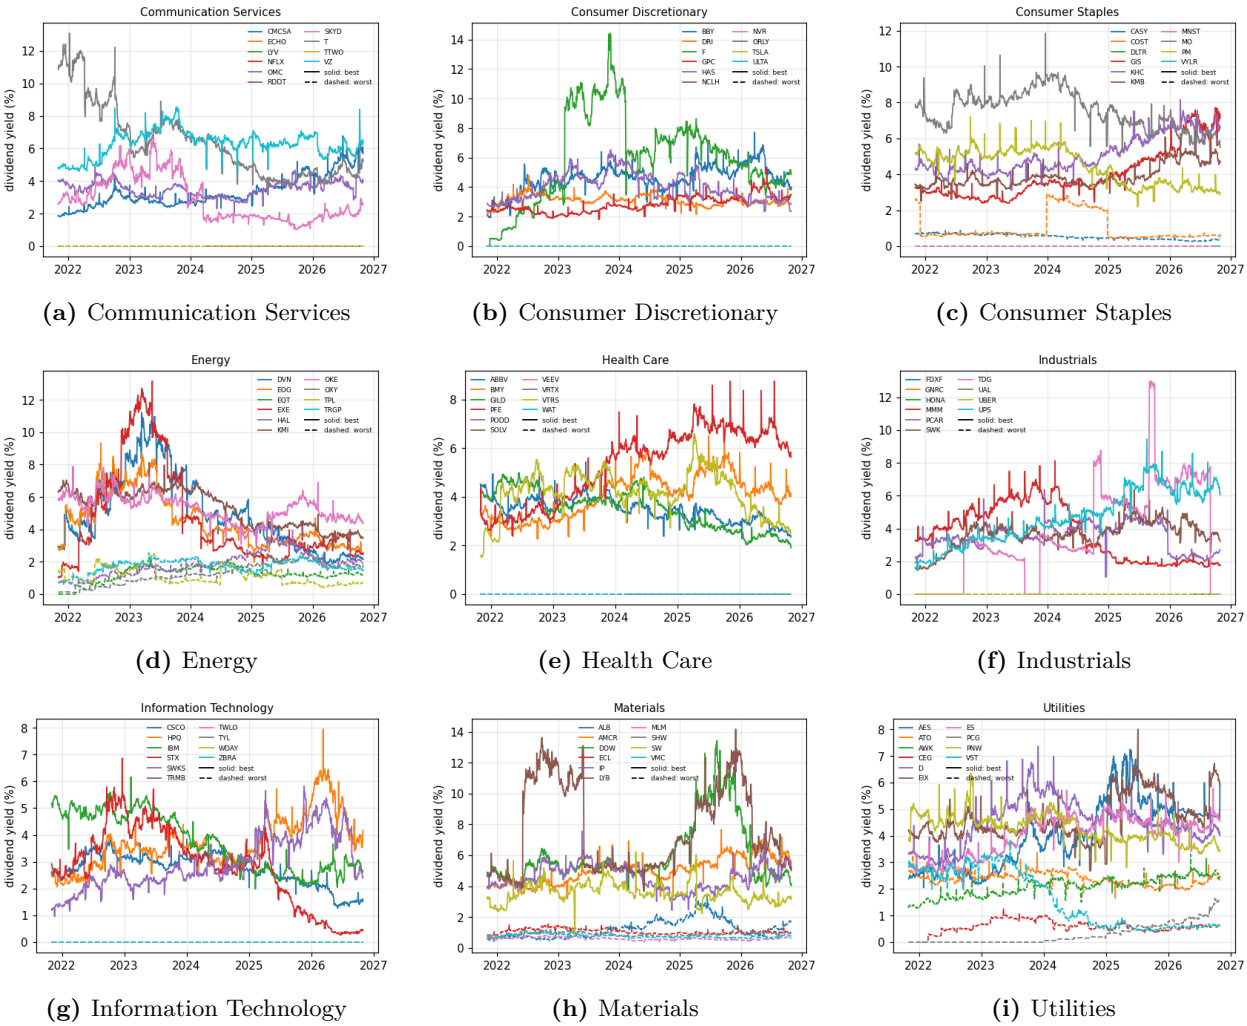

Figure 19: Median trailing 12-month dividend yield of the companies in each GICS sector over the last 5 years, percent.

(a) Communication Services **(b)** Consumer Discretionary **(c)** Consumer Staples

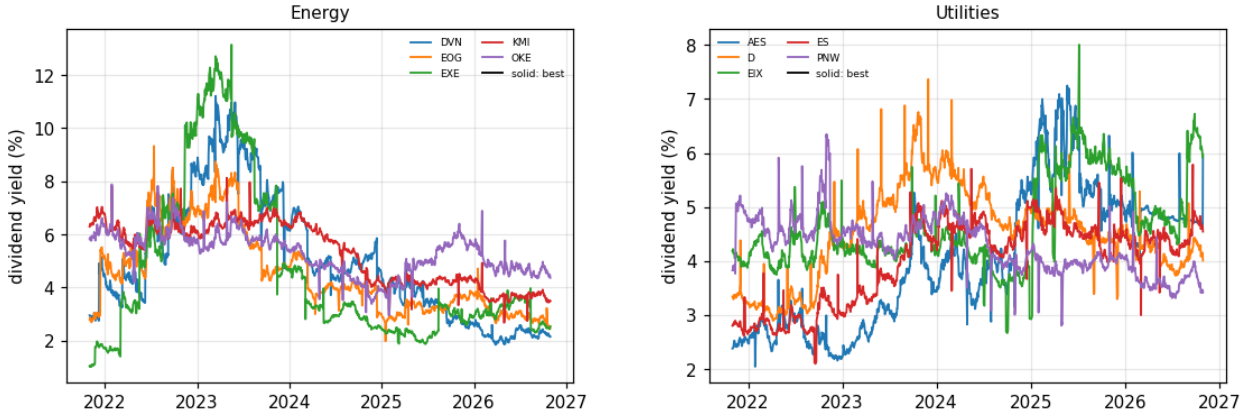

(d) Energy **(e)** Health Care **(f)** Industrials

(g) Information Technology **(h)** Materials **(i)** Utilities

Figure 20: Trailing dividend yield over the last 5 years, per GICS sector, of the 5 companies with the highest (solid) and lowest (dashed) mean yield; percent.

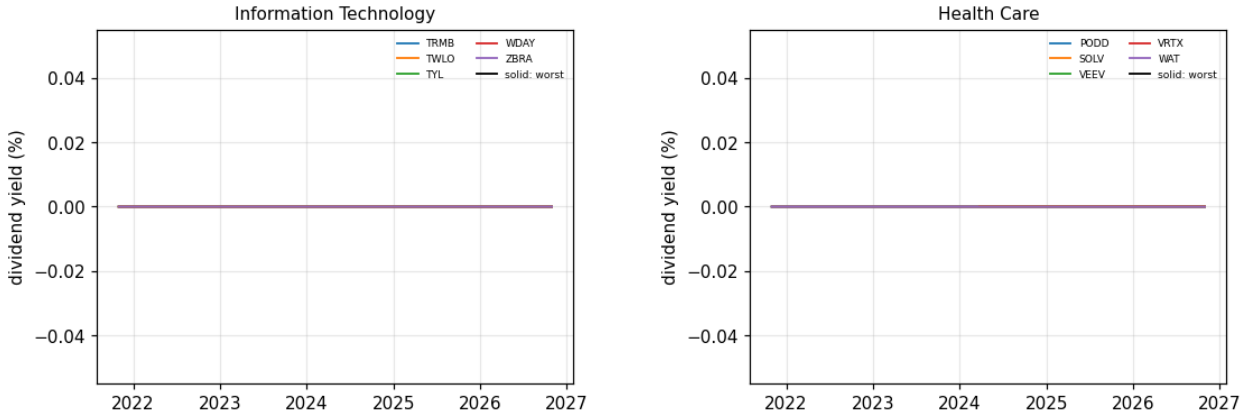

7.1 Overview

Over the last 5 years Energy (3.30%) and Utilities paid the highest median yield, Information Technology (0.25%) and Health Care the lowest. The full history of every sector is in Appendix F.

(a) Energy **(b)** Utilities

Figure 21: The two sectors with the highest median yield over the last 5 years, (a) Energy and (b) Utilities, with their 5 highest-yielding companies; percent.

(a) Information Technology **(b)** Health Care

Figure 22: The two sectors with the lowest median yield, (a) Information Technology and (b) Health Care, with their 5 lowest-yielding companies; percent.

A Tickers and company names

The companies analysed, by GICS sector, sorted by ticker. Tickers follow Yahoo Finance (a dash for a share class, as in BF-B).

A.1 Communication Services

Ticker	Company
APP	AppLovin
CHTR	Charter Communications
CMCSA	Comcast
DIS	Walt Disney Company (The)
ECHO	EchoStar
FOX	Fox Corporation (Class B)
FOXA	Fox Corporation (Class A)
GOOG	Alphabet Inc. (Class C)
GOOGL	Alphabet Inc. (Class A)
LYV	Live Nation Entertainment
META	Meta Platforms
NFLX	Netflix
NWS	News Corp (Class B)
NWSA	News Corp (Class A)
OMC	Omnicom Group
RDDT	Reddit
SKYD	Skydance
T	AT&T
TKO	TKO Group Holdings
TMUS	T-Mobile US
TTWO	Take-Two Interactive
VZ	Verizon

A.2 Consumer Discretionary

Ticker	Company
ABNB	Airbnb

B Fundamentals: full history per sector

For every GICS sector, the revenue of its companies with the highest (solid) and lowest (dashed) annualised revenue growth over all years in the data.

B.1 Communication Services

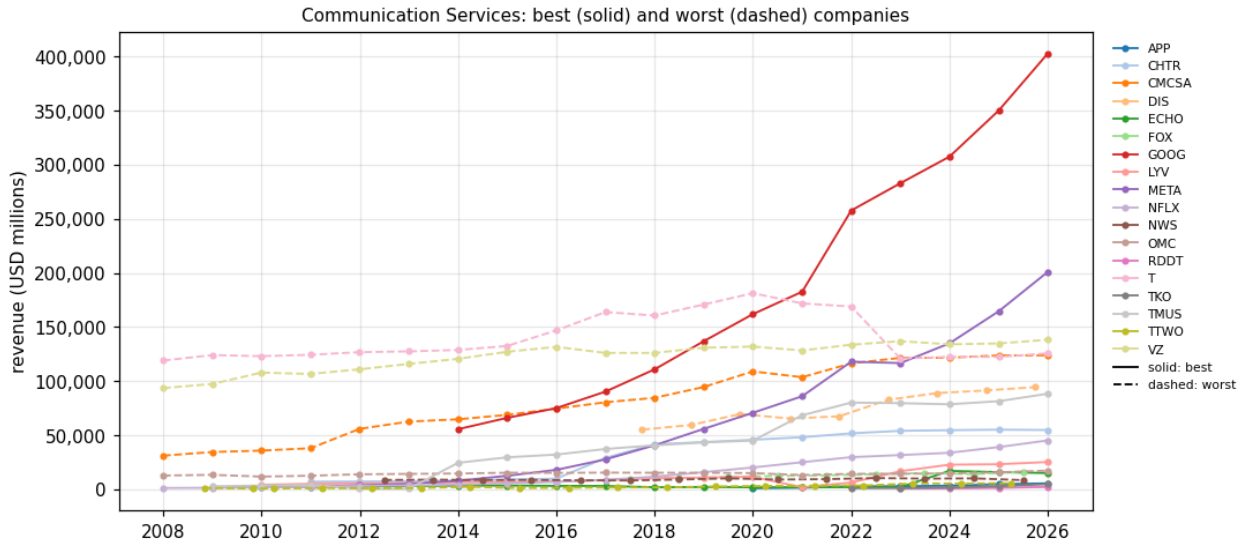

Figure 23: Communication Services: annual revenue of the 10 companies with the highest (solid) and lowest (dashed) revenue growth over the full history; USD millions.

B.2 Consumer Discretionary

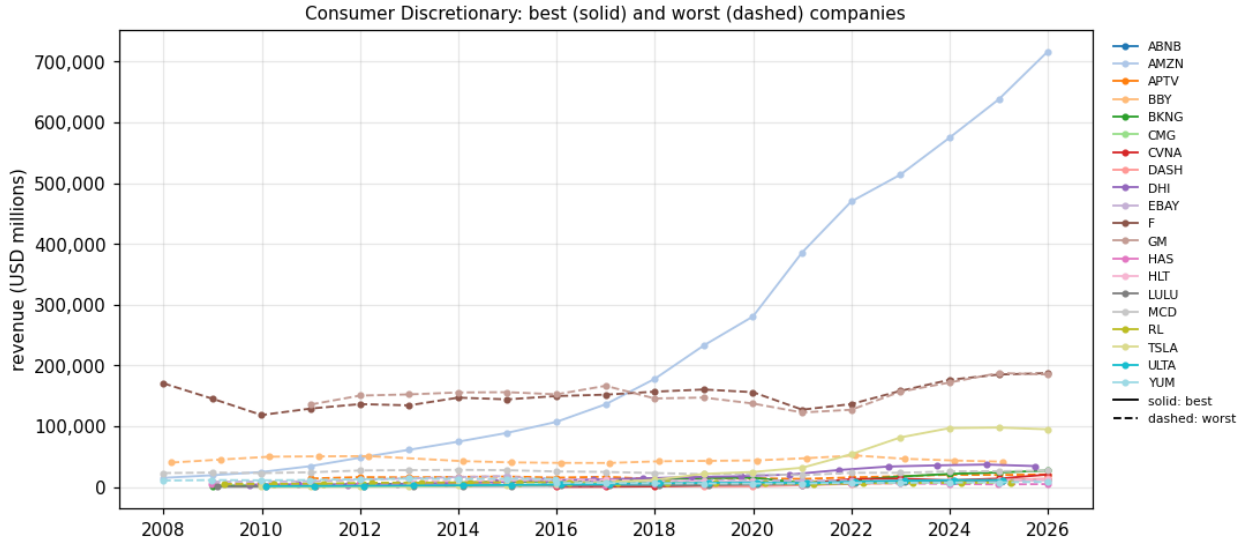

Figure 24: Consumer Discretionary: annual revenue of the 10 companies with the highest (solid) and lowest (dashed) revenue growth over the full history; USD millions.

B.3 Consumer Staples

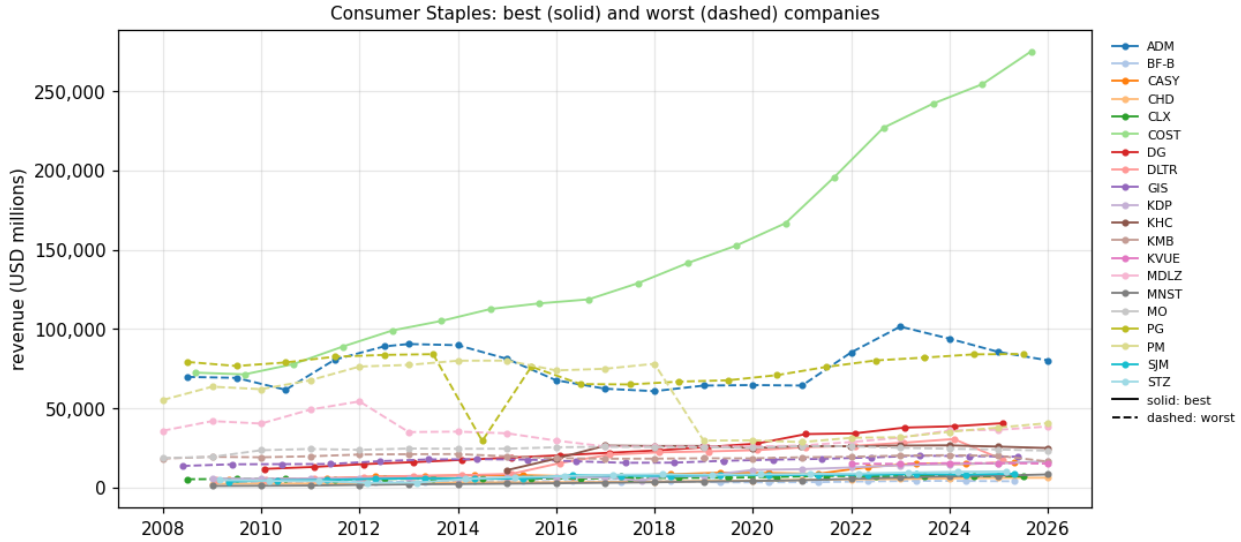

Figure 25: Consumer Staples: annual revenue of the 10 companies with the highest (solid) and lowest (dashed) revenue growth over the full history; USD millions.

B.4 Energy

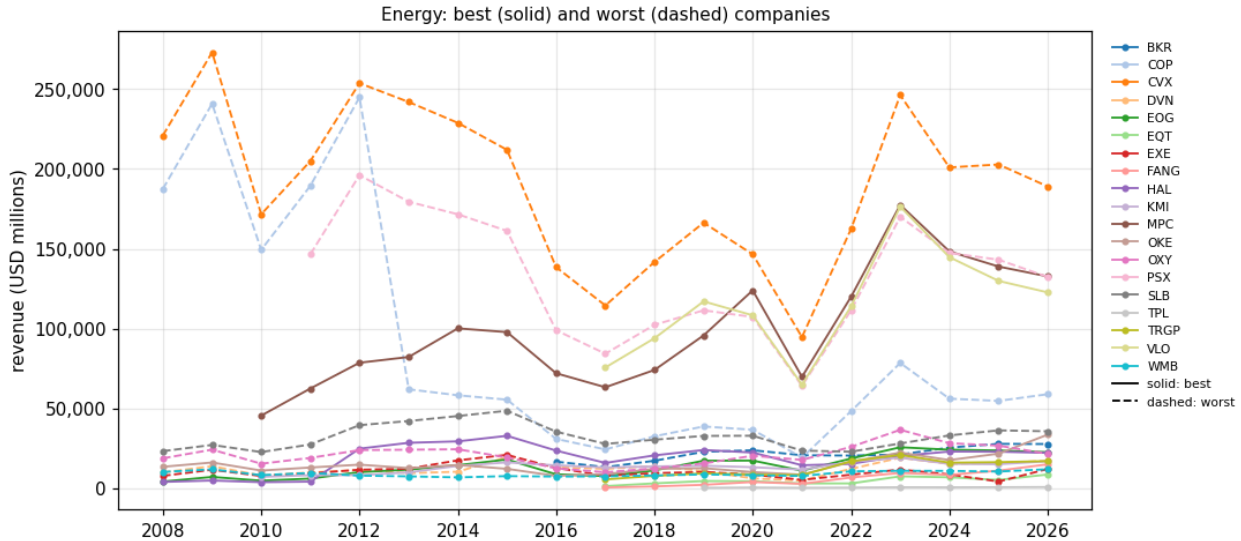

Figure 26: Energy: annual revenue of the 10 companies with the highest (solid) and lowest (dashed) revenue growth over the full history; USD millions.

B.5 Health Care

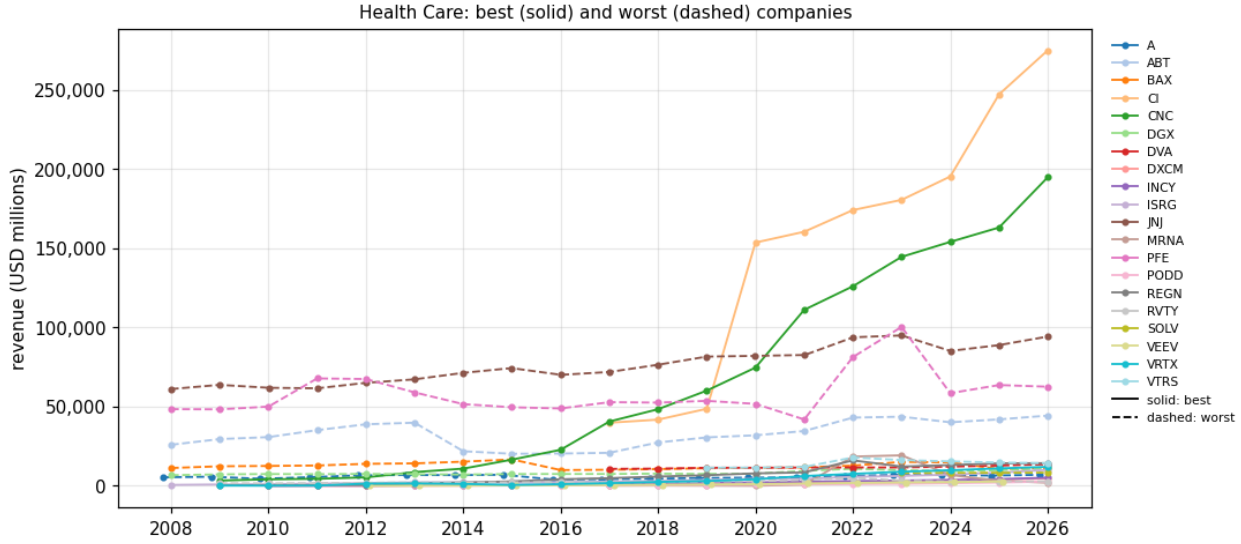

Figure 27: Health Care: annual revenue of the 10 companies with the highest (solid) and lowest (dashed) revenue growth over the full history; USD millions.

B.6 Industrials

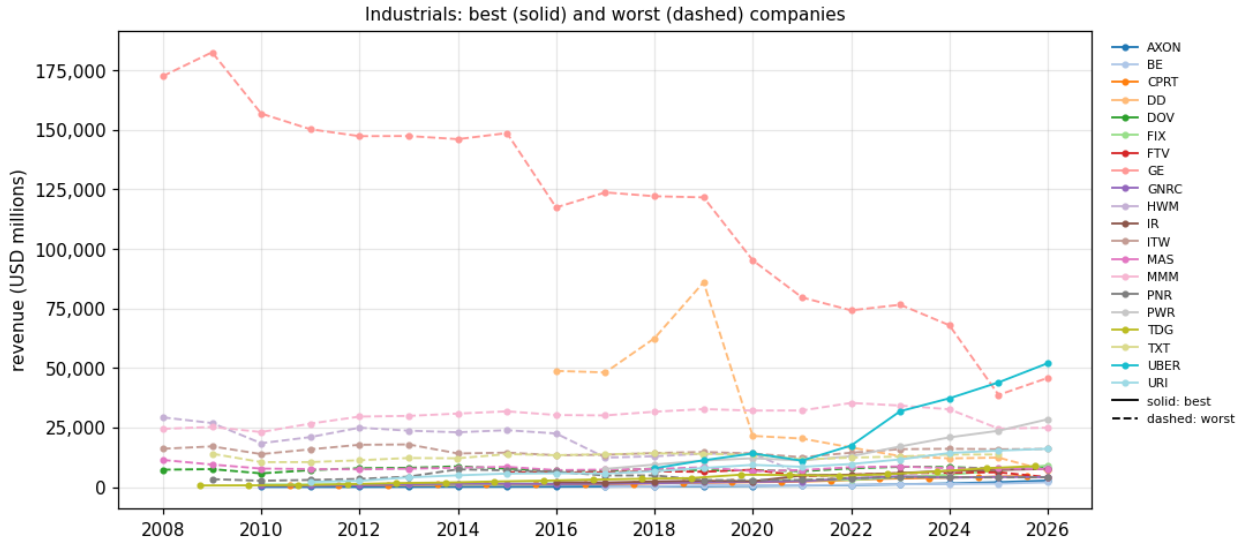

Figure 28: Industrials: annual revenue of the 10 companies with the highest (solid) and lowest (dashed) revenue growth over the full history; USD millions.

B.7 Information Technology

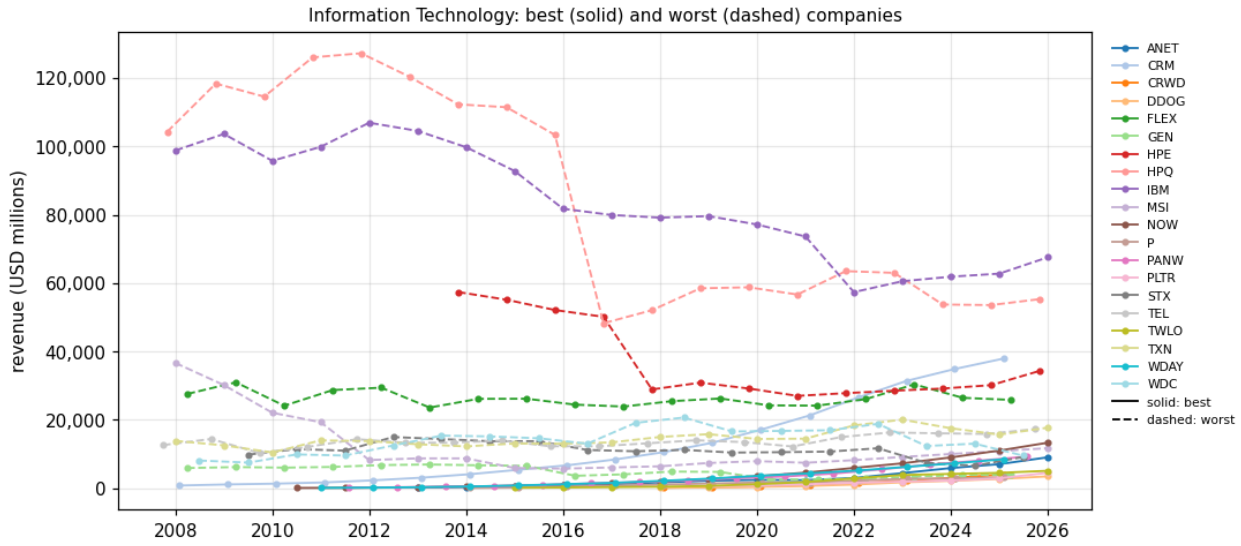

Figure 29: Information Technology: annual revenue of the 10 companies with the highest (solid) and lowest (dashed) revenue growth over the full history; USD millions.

B.8 Materials

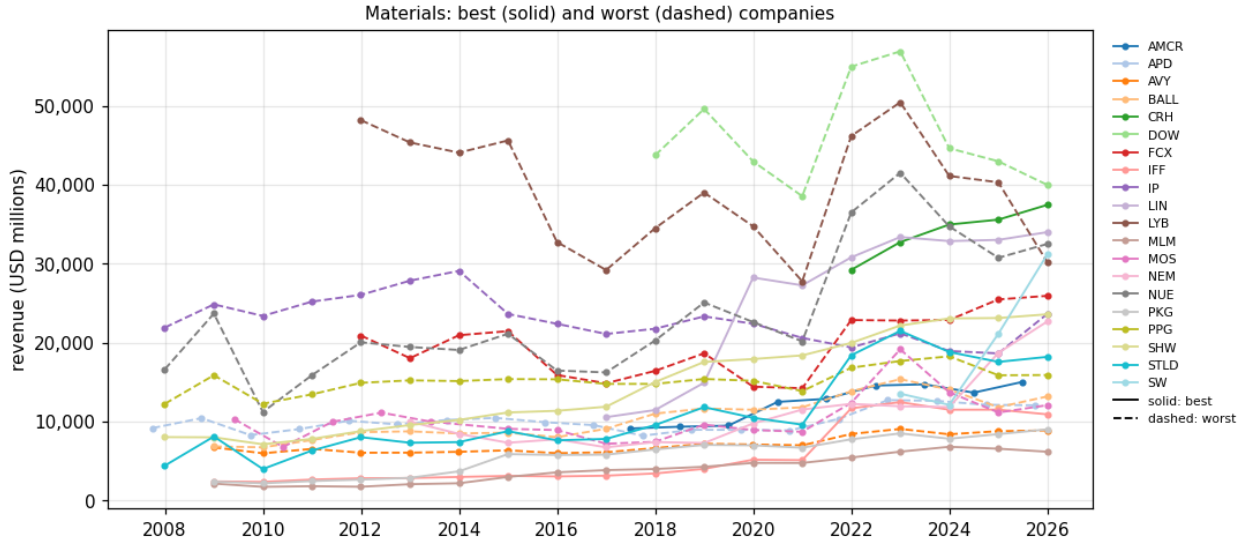

Figure 30: Materials: annual revenue of the 10 companies with the highest (solid) and lowest (dashed) revenue growth over the full history; USD millions.

B.9 Utilities

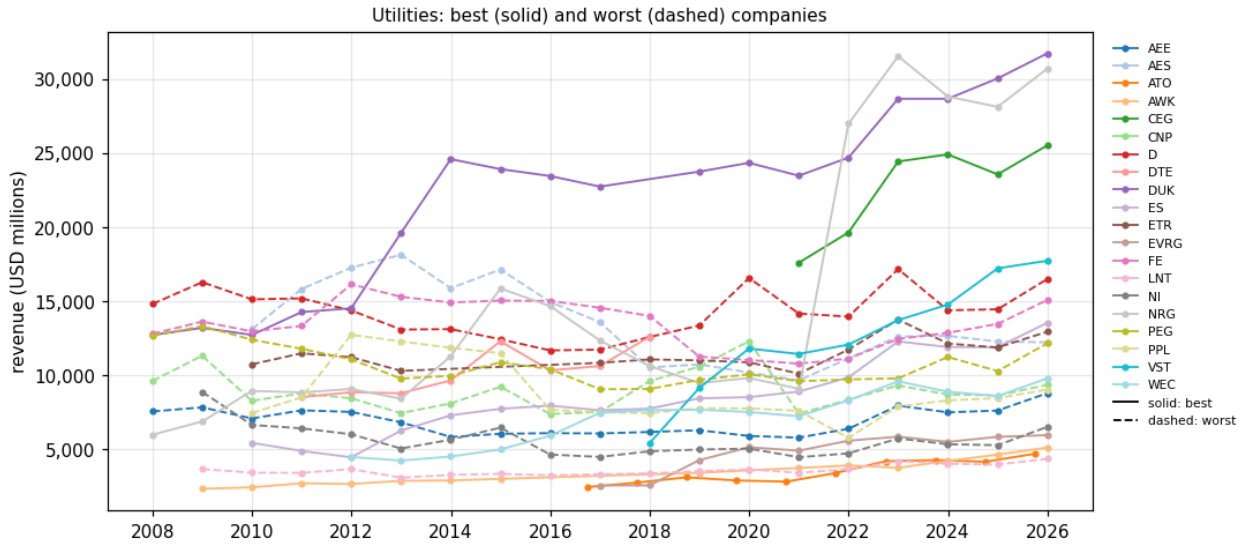

Figure 31: Utilities: annual revenue of the 10 companies with the highest (solid) and lowest (dashed) revenue growth over the full history; USD millions.

C Total return: full history per sector

For every GICS sector, growth of 1 USD for its companies with the highest (solid) and lowest (dashed) annualised total return since each company's first date in the data (at least one year).

C.1 Communication Services

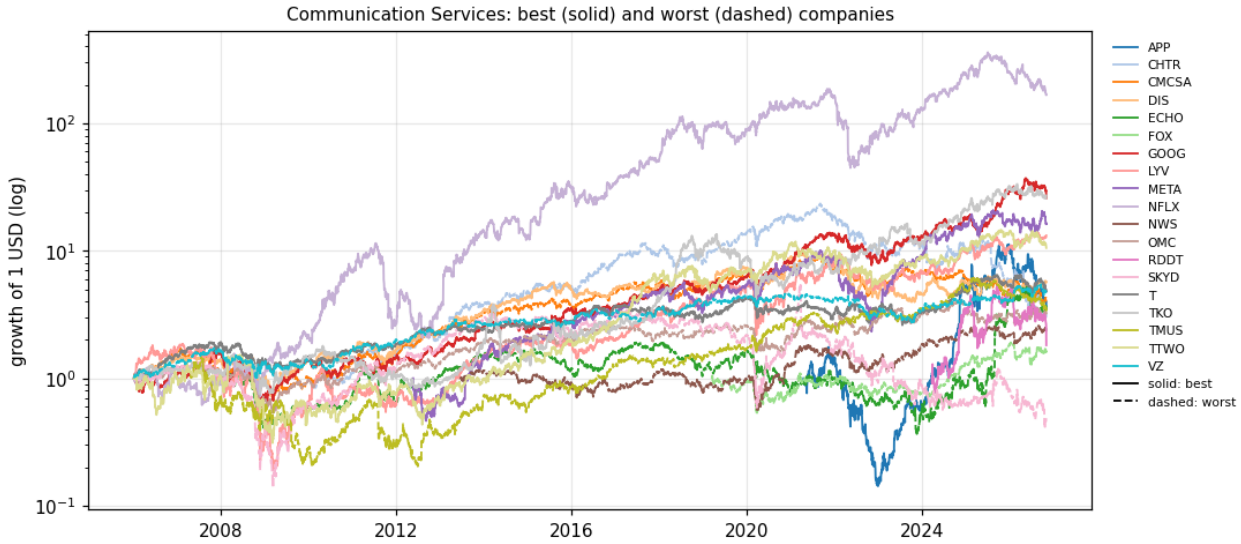

Figure 32: Communication Services: growth of 1 USD for the 10 companies with the highest (solid) and lowest (dashed) total return over the full history; log scale.

C.2 Consumer Discretionary

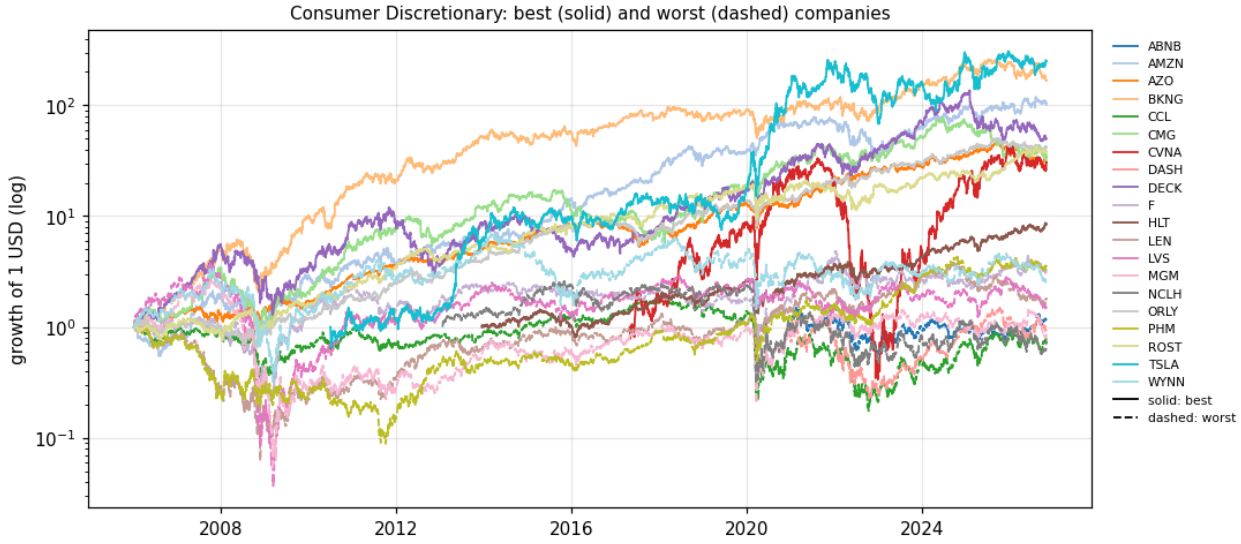

Figure 33: Consumer Discretionary: growth of 1 USD for the 10 companies with the highest (solid) and lowest (dashed) total return over the full history; log scale.

C.3 Consumer Staples

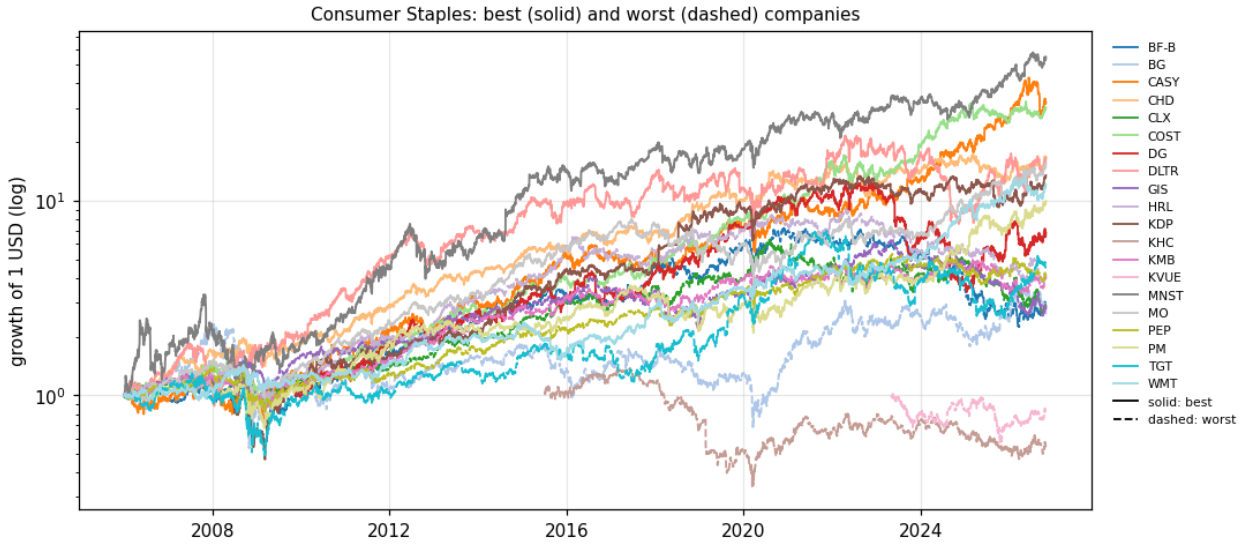

Figure 34: Consumer Staples: growth of 1 USD for the 10 companies with the highest (solid) and lowest (dashed) total return over the full history; log scale.

C.4 Energy

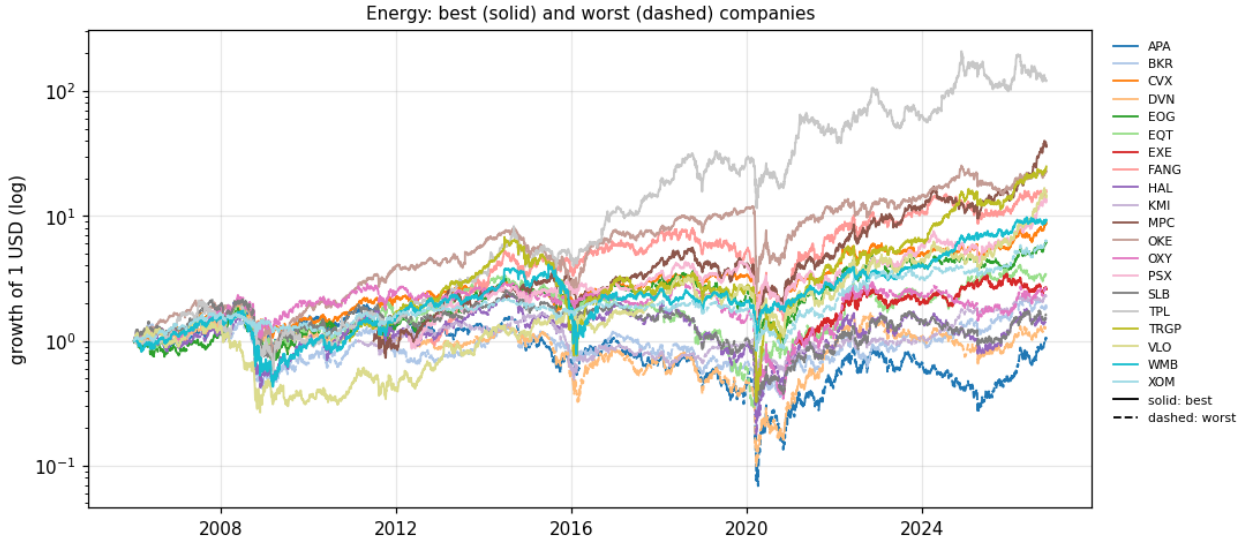

Figure 35: Energy: growth of 1 USD for the 10 companies with the highest (solid) and lowest (dashed) total return over the full history; log scale.

C.5 Health Care

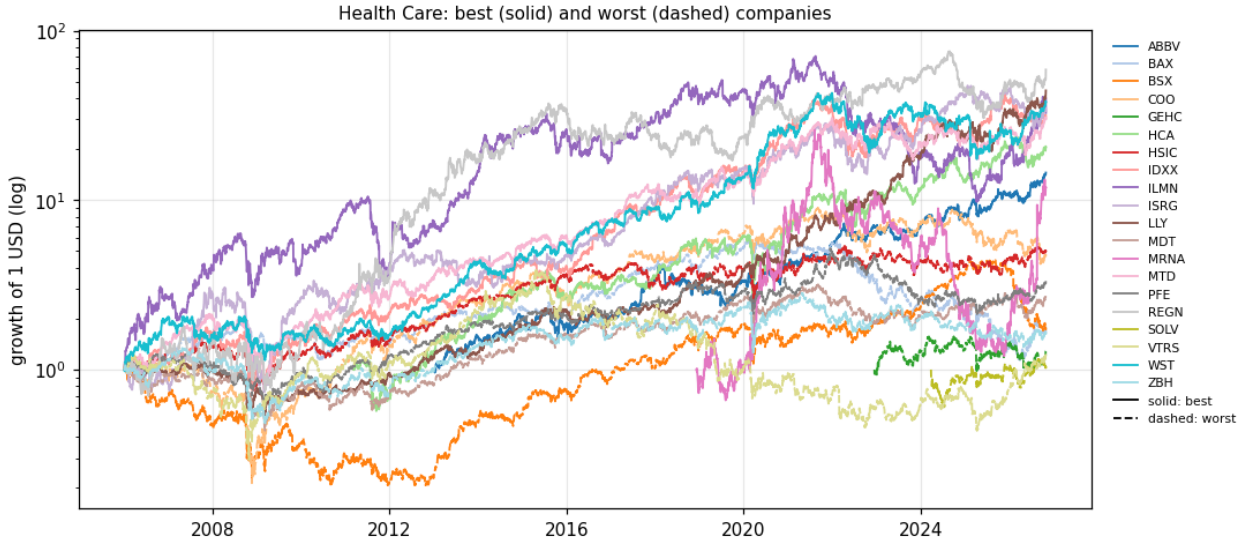

Figure 36: Health Care: growth of 1 USD for the 10 companies with the highest (solid) and lowest (dashed) total return over the full history; log scale.

C.6 Industrials

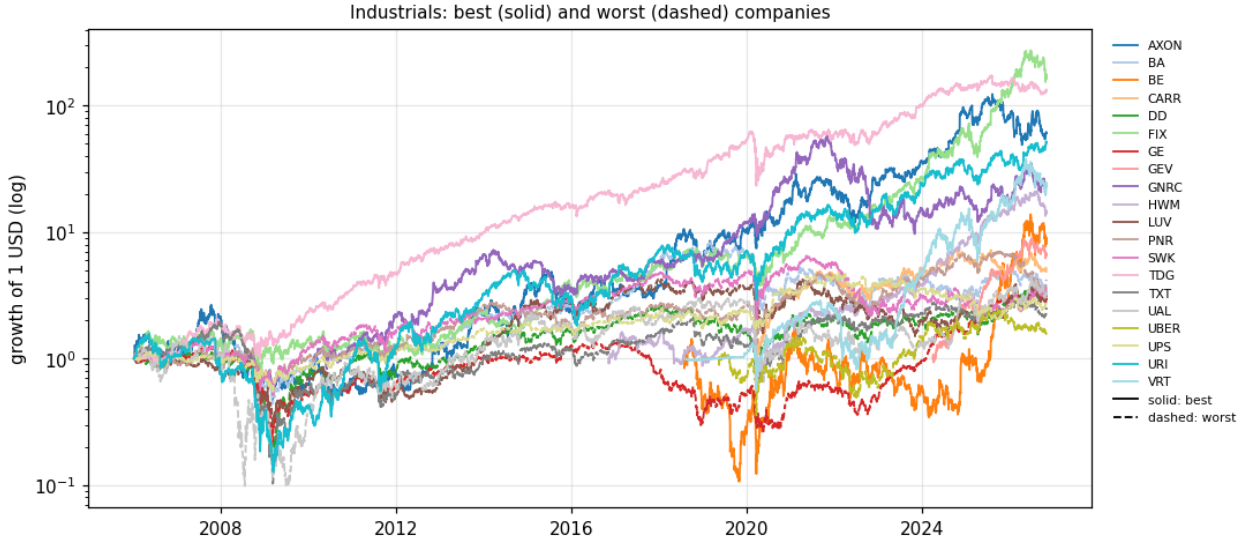

Figure 37: Industrials: growth of 1 USD for the 10 companies with the highest (solid) and lowest (dashed) total return over the full history; log scale.

C.7 Information Technology

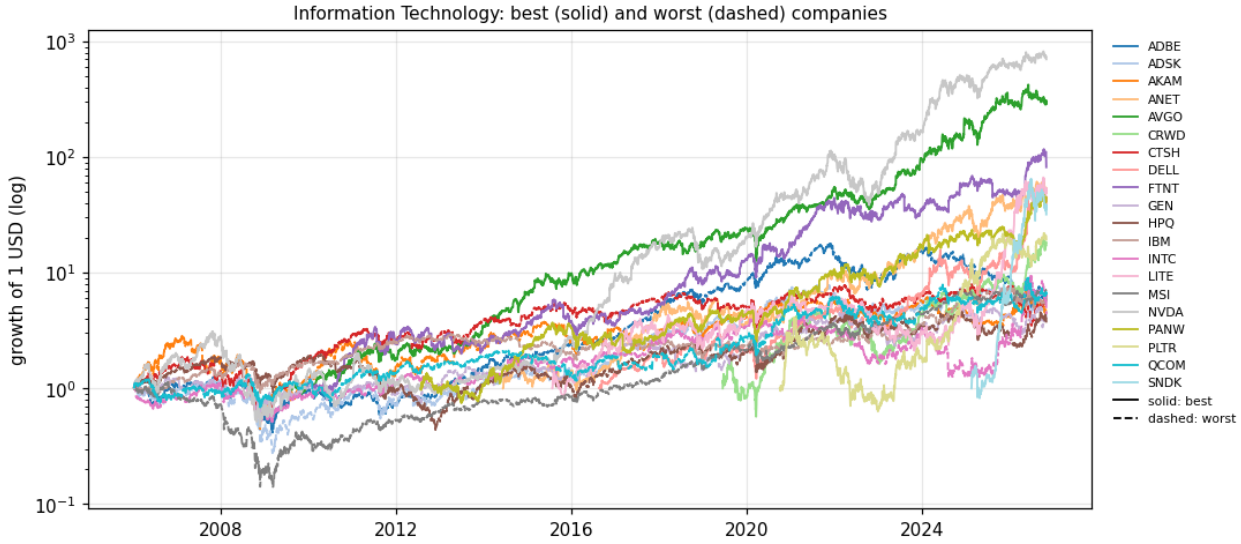

Figure 38: Information Technology: growth of 1 USD for the 10 companies with the highest (solid) and lowest (dashed) total return over the full history; log scale.

C.8 Materials

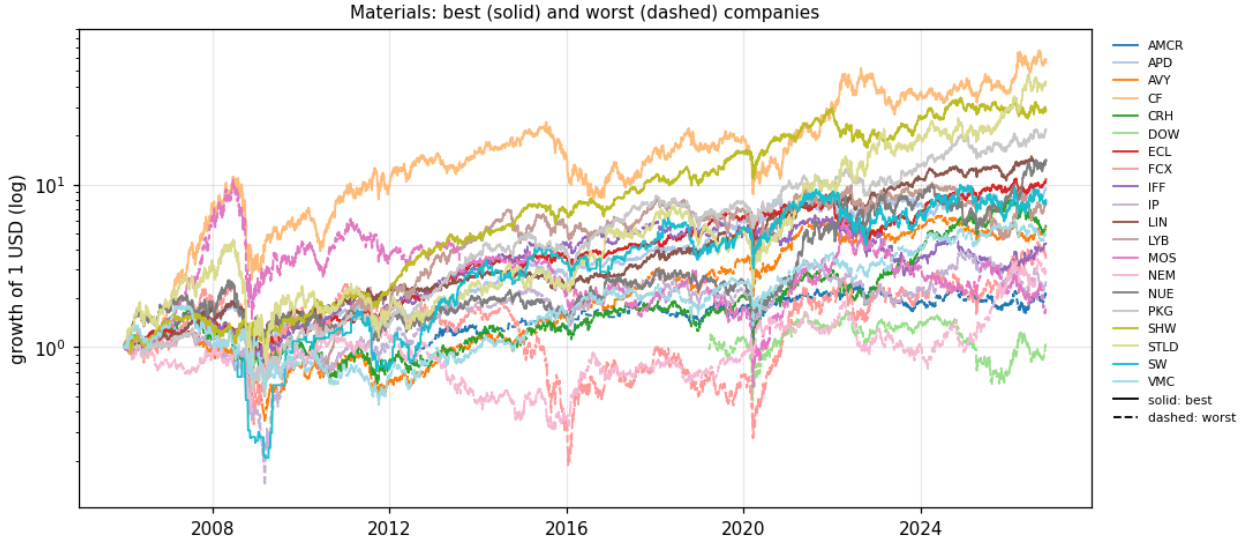

Figure 39: Materials: growth of 1 USD for the 10 companies with the highest (solid) and lowest (dashed) total return over the full history; log scale.

C.9 Utilities

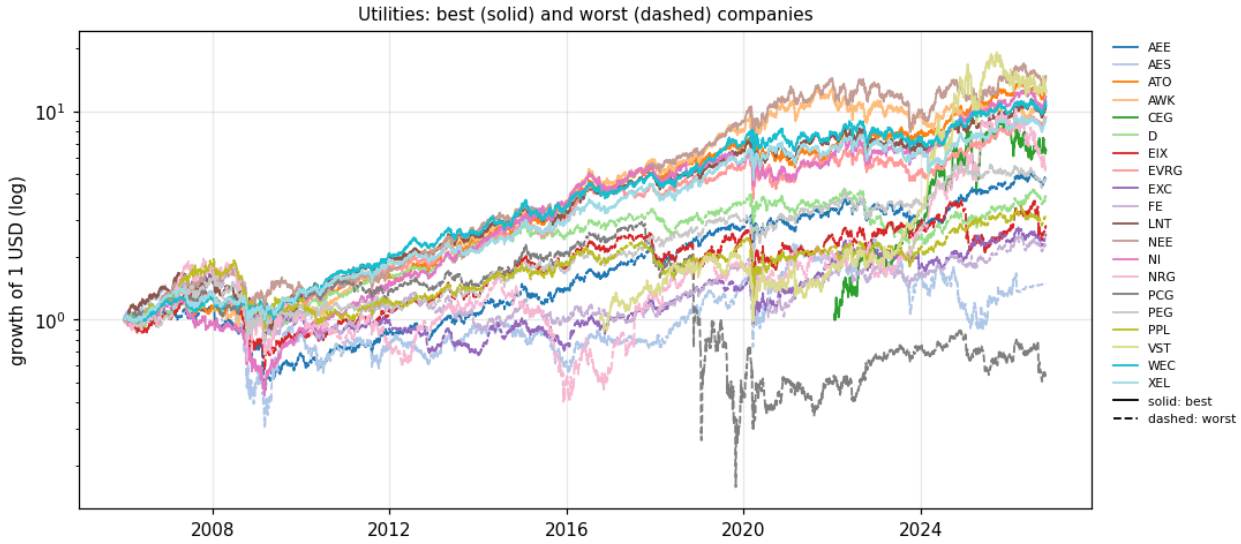

Figure 40: Utilities: growth of 1 USD for the 10 companies with the highest (solid) and lowest (dashed) total return over the full history; log scale.

D Relative return: full history per sector

For every GICS sector, growth relative to the sector fund for its companies that beat it most (solid) and trailed it most (dashed) over the full history.

D.1 Communication Services

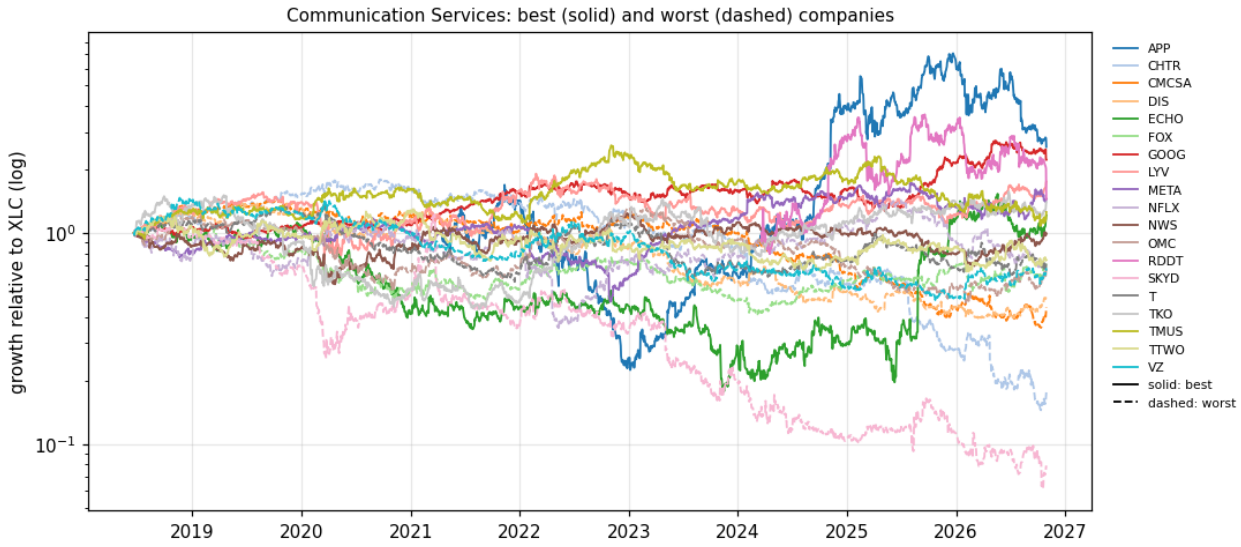

Figure 41: Communication Services: growth relative to XLC for the 10 companies with the highest (solid) and lowest (dashed) annualised relative return over the full history; log scale.

D.2 Consumer Discretionary

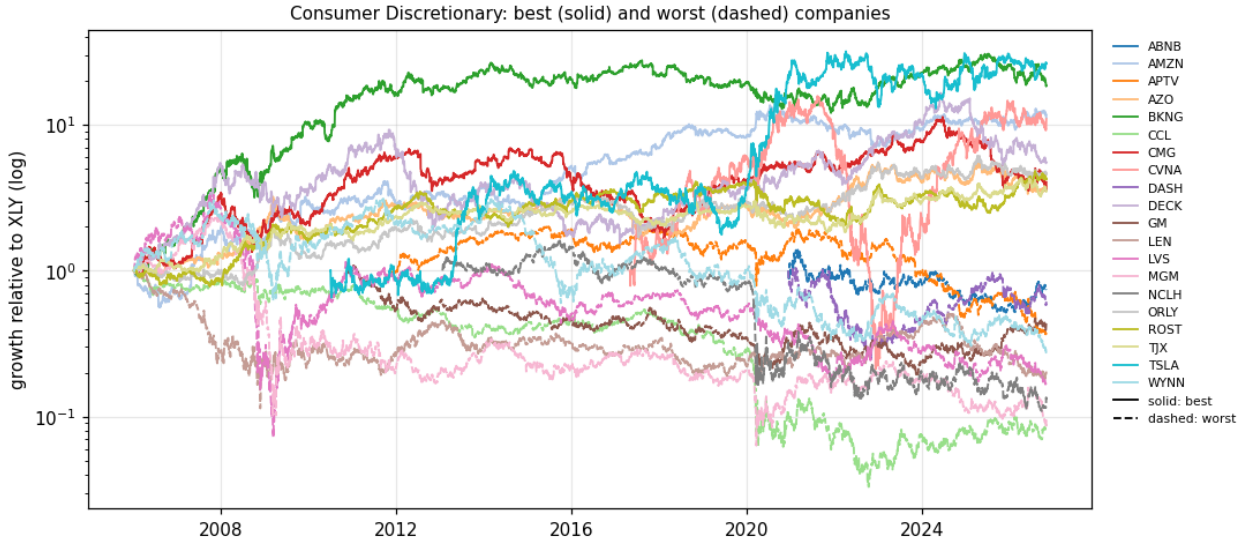

Figure 42: Consumer Discretionary: growth relative to XLY for the 10 companies with the highest (solid) and lowest (dashed) annualised relative return over the full history; log scale.

D.3 Consumer Staples

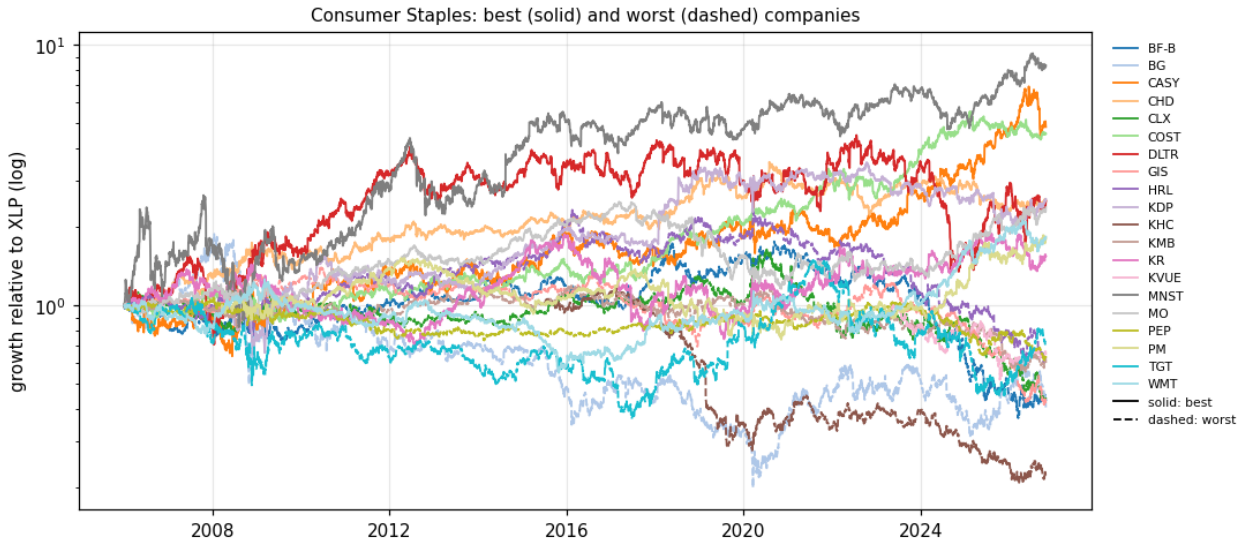

Figure 43: Consumer Staples: growth relative to XLP for the 10 companies with the highest (solid) and lowest (dashed) annualised relative return over the full history; log scale.

D.4 Energy

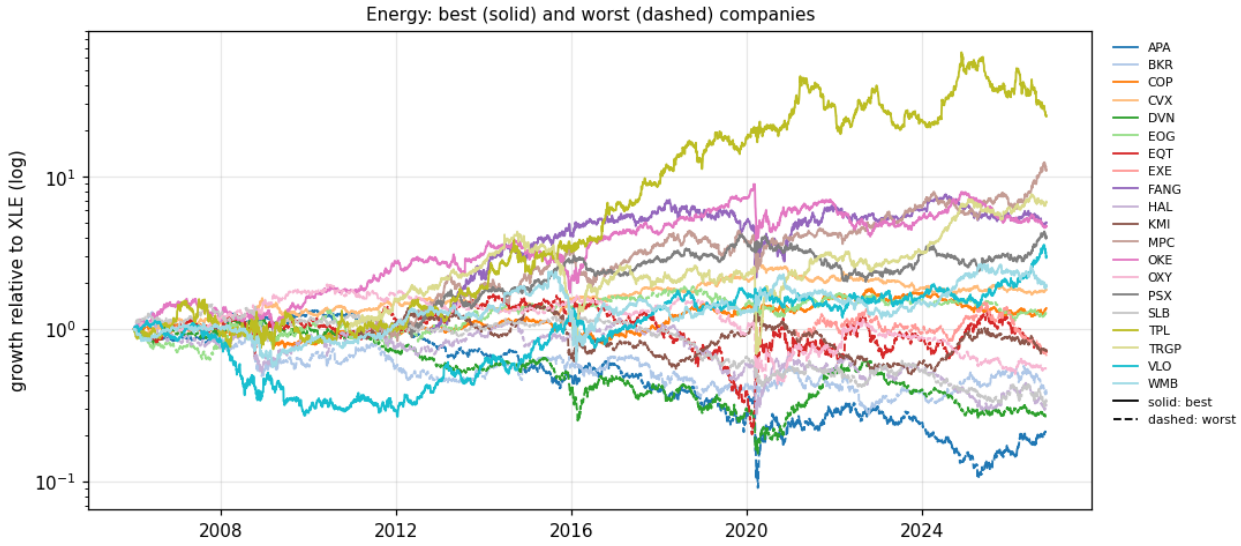

Figure 44: Energy: growth relative to XLE for the 10 companies with the highest (solid) and lowest (dashed) annualised relative return over the full history; log scale.

D.5 Health Care

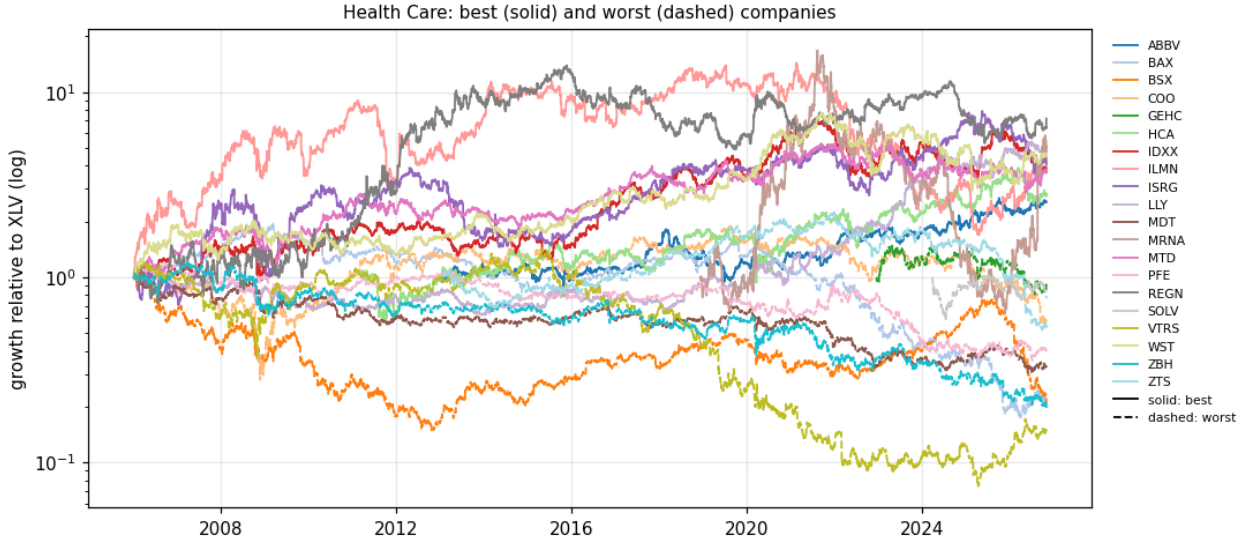

Figure 45: Health Care: growth relative to XLV for the 10 companies with the highest (solid) and lowest (dashed) annualised relative return over the full history; log scale.

D.6 Industrials

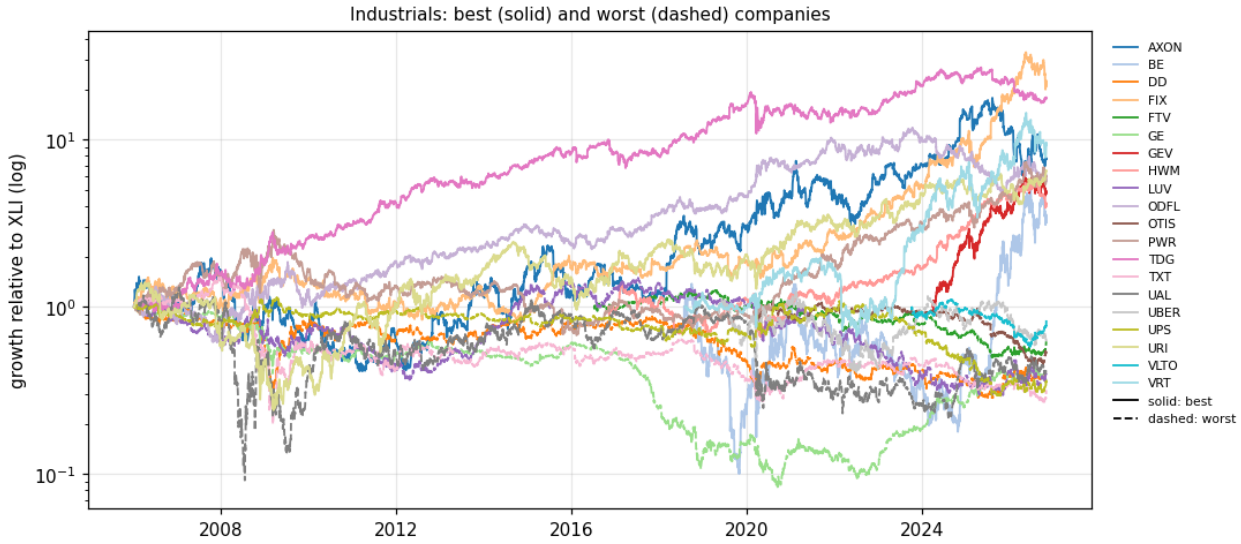

Figure 46: Industrials: growth relative to XLI for the 10 companies with the highest (solid) and lowest (dashed) annualised relative return over the full history; log scale.

D.7 Information Technology

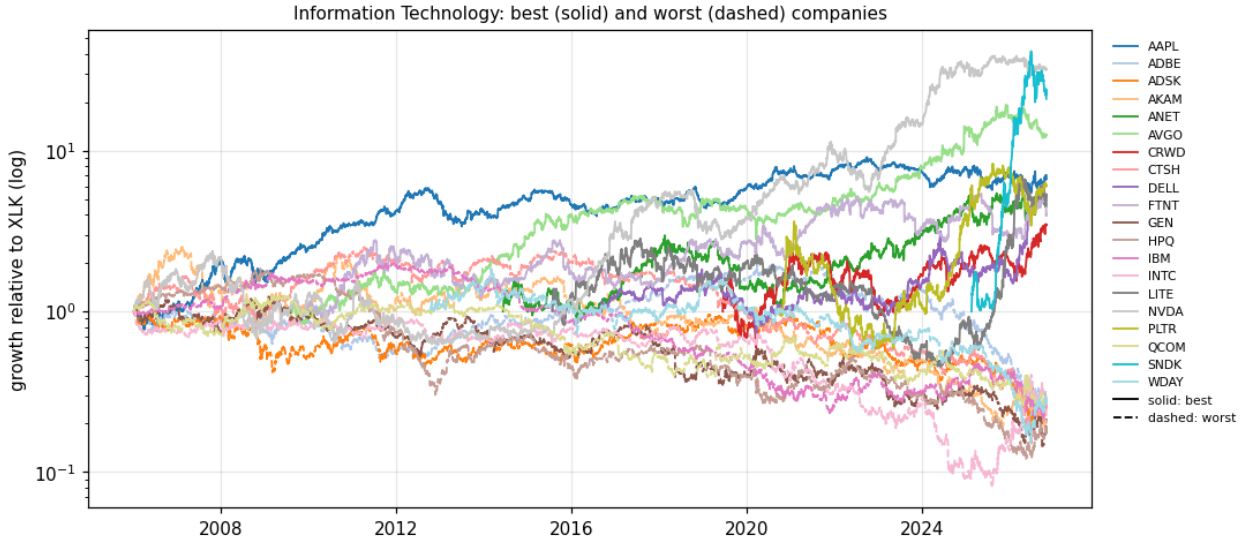

Figure 47: Information Technology: growth relative to XLK for the 10 companies with the highest (solid) and lowest (dashed) annualised relative return over the full history; log scale.

D.8 Materials

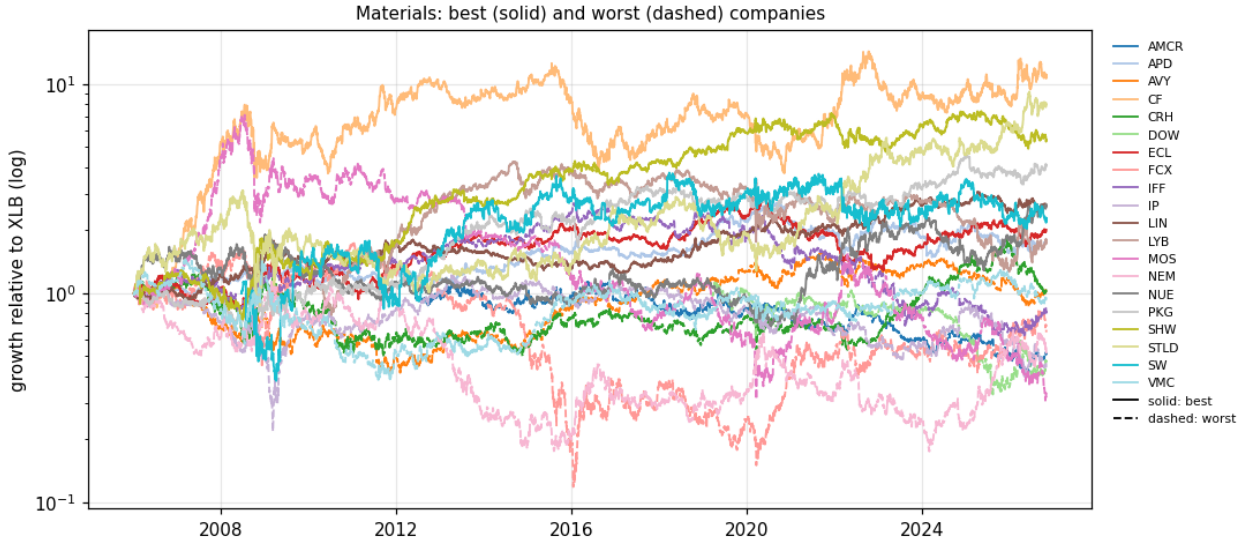

Figure 48: Materials: growth relative to XLB for the 10 companies with the highest (solid) and lowest (dashed) annualised relative return over the full history; log scale.

D.9 Utilities

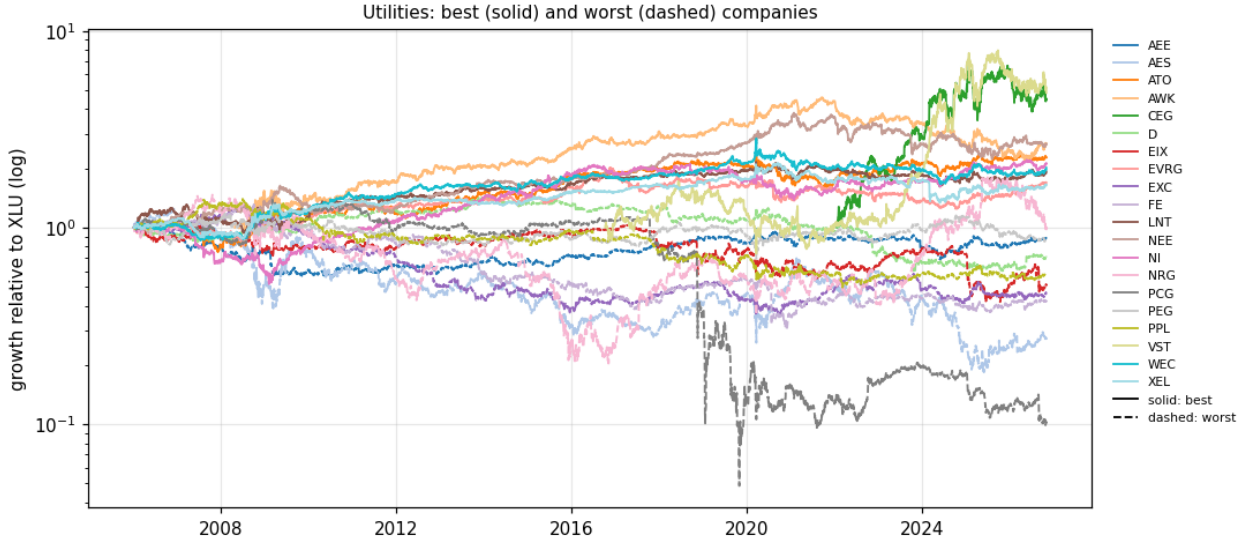

Figure 49: Utilities: growth relative to XLU for the 10 companies with the highest (solid) and lowest (dashed) annualised relative return over the full history; log scale.

E P/E: full history per sector

For every GICS sector, the P/E of its companies with the lowest (solid) and highest (dashed) median P/E over the full history, and the lead-lag correlation of monthly P/E and price changes. P/E is price divided by earnings per share, so at lag 0 the two move together by construction; the other lags show whether P/E changes come before or after price changes.

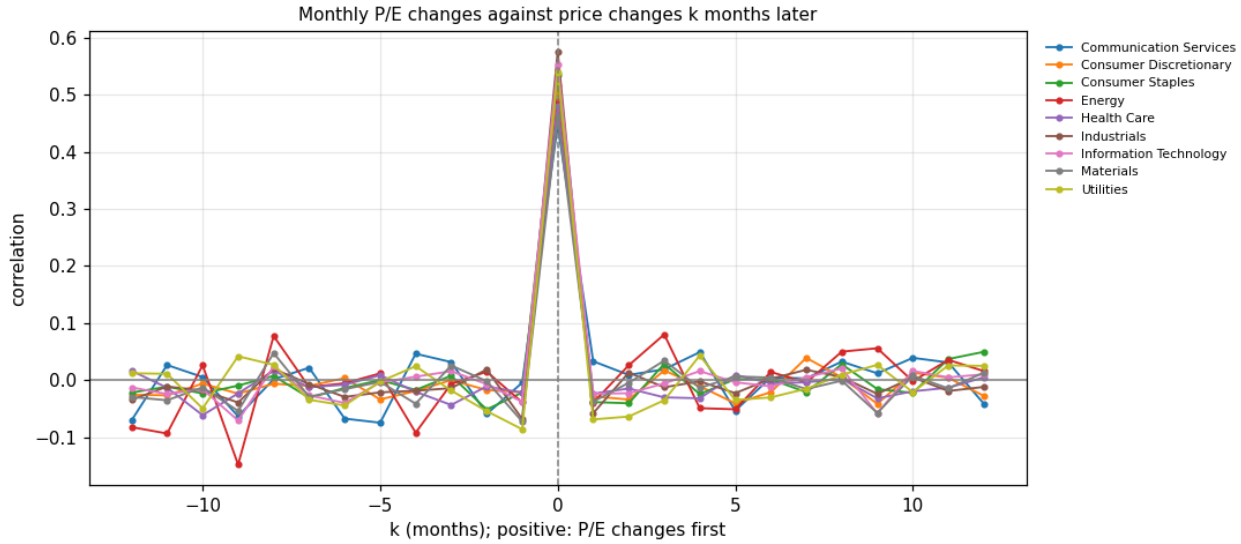

Figure 50: Mean correlation, over each sector's companies, of monthly P/E changes with price changes k months later; positive k: the P/E changes first.

E.1 Communication Services

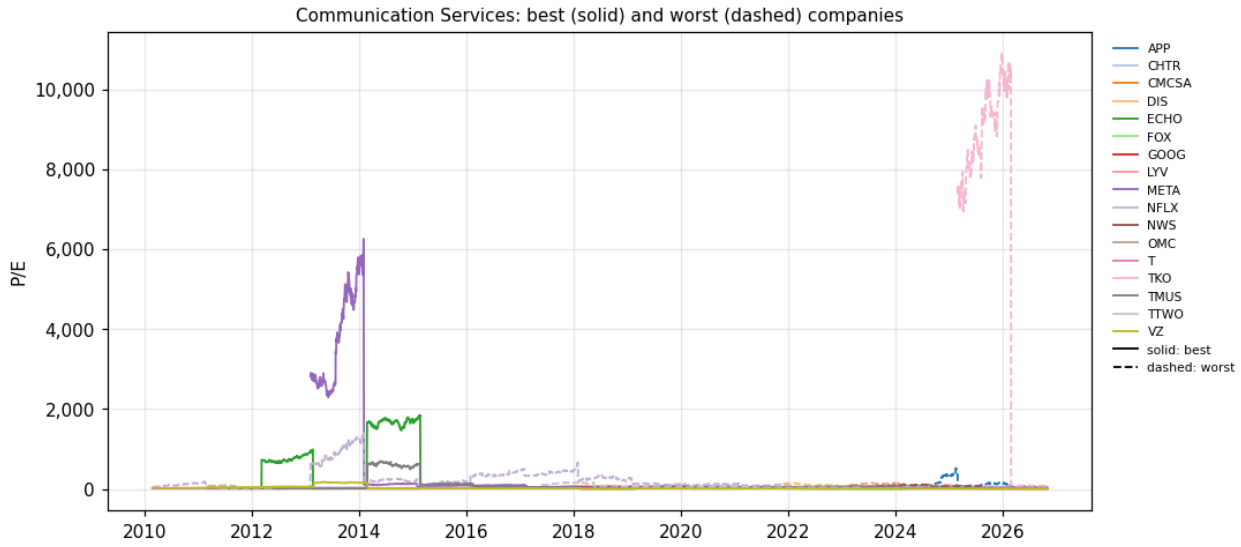

Figure 51: Communication Services: P/E of the 10 companies with the lowest (solid) and highest (dashed) median P/E over the full history.

E.2 Consumer Discretionary

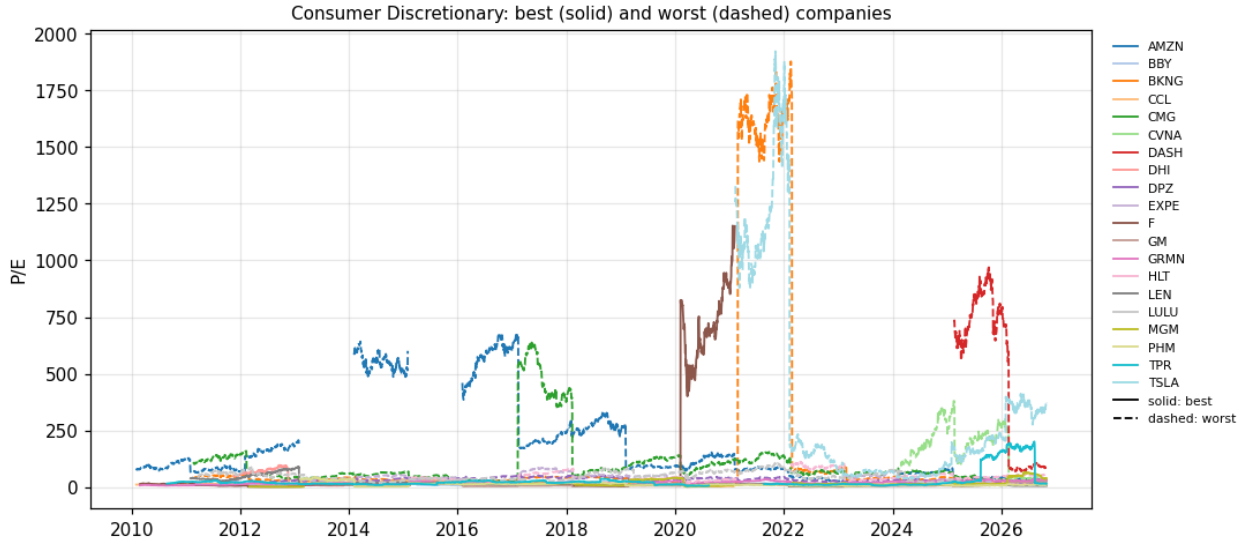

Figure 52: Consumer Discretionary: P/E of the 10 companies with the lowest (solid) and highest (dashed) median P/E over the full history.

E.3 Consumer Staples

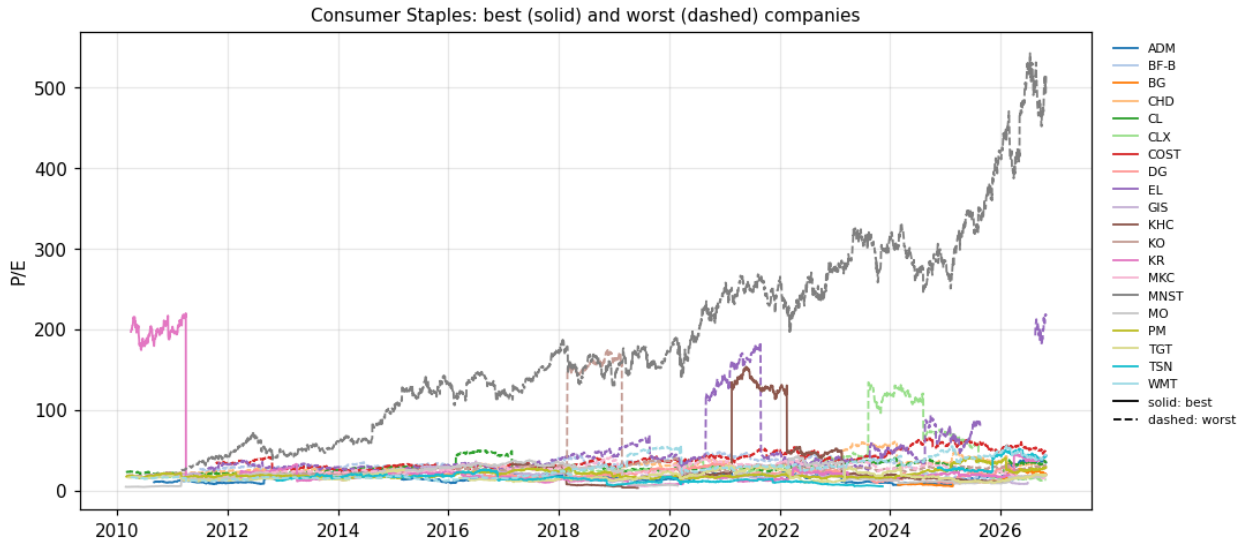

Figure 53: Consumer Staples: P/E of the 10 companies with the lowest (solid) and highest (dashed) median P/E over the full history.

E.4 Energy

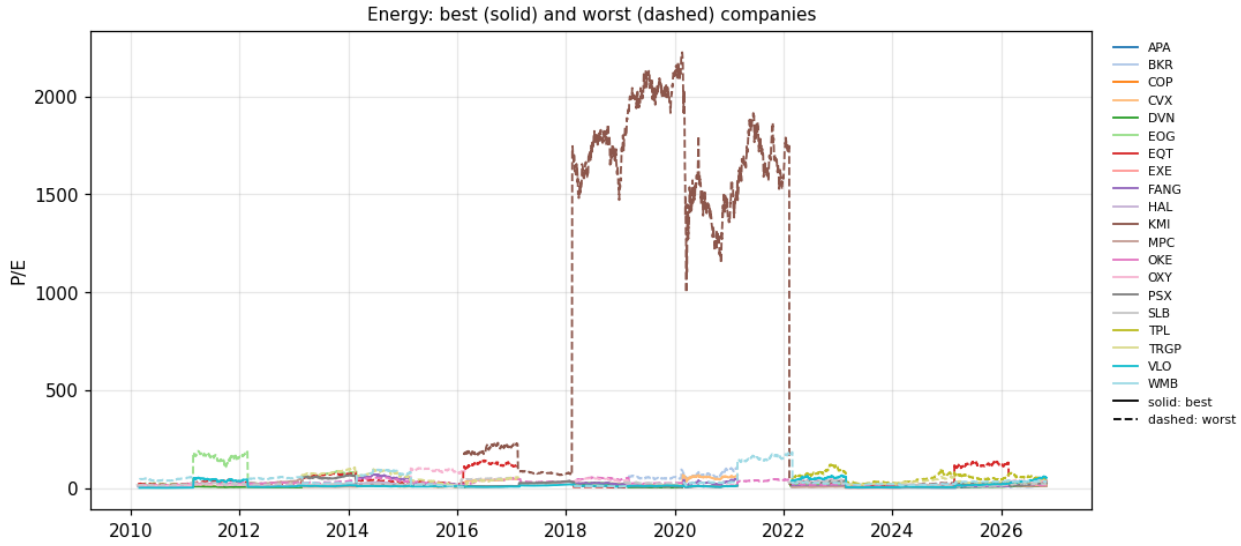

Figure 54: Energy: P/E of the 10 companies with the lowest (solid) and highest (dashed) median P/E over the full history.

E.5 Health Care

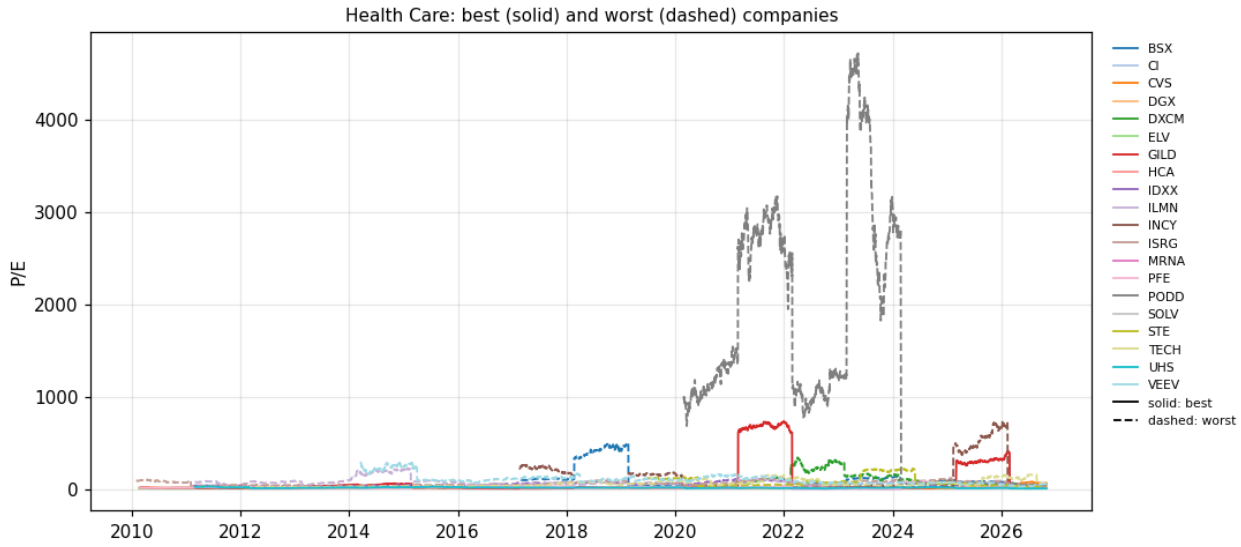

Figure 55: Health Care: P/E of the 10 companies with the lowest (solid) and highest (dashed) median P/E over the full history.

E.6 Industrials

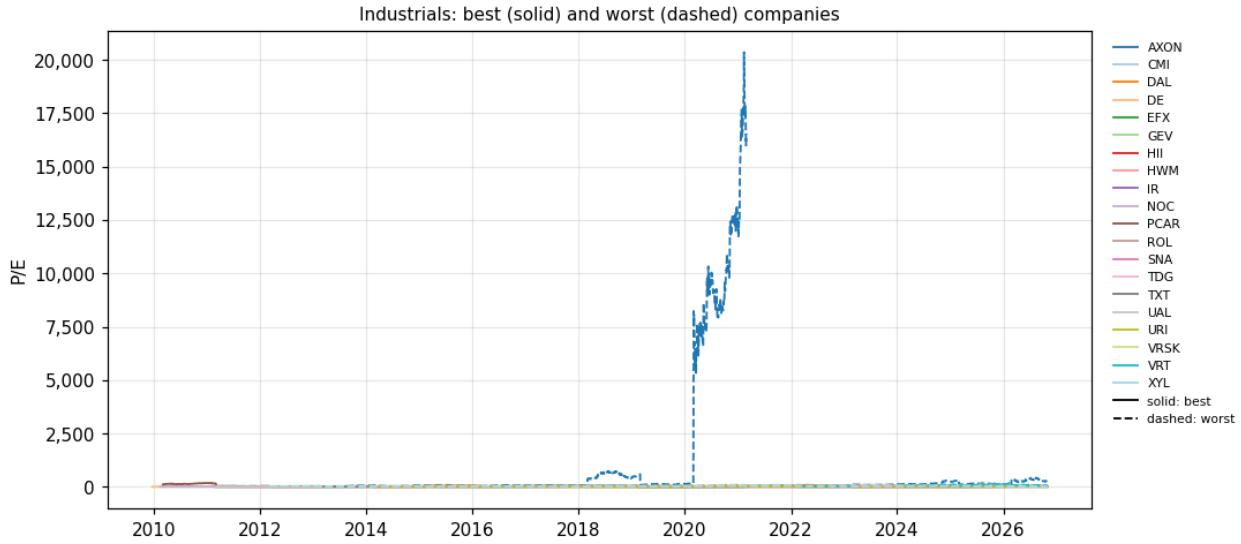

Figure 56: Industrials: P/E of the 10 companies with the lowest (solid) and highest (dashed) median P/E over the full history.

E.7 Information Technology

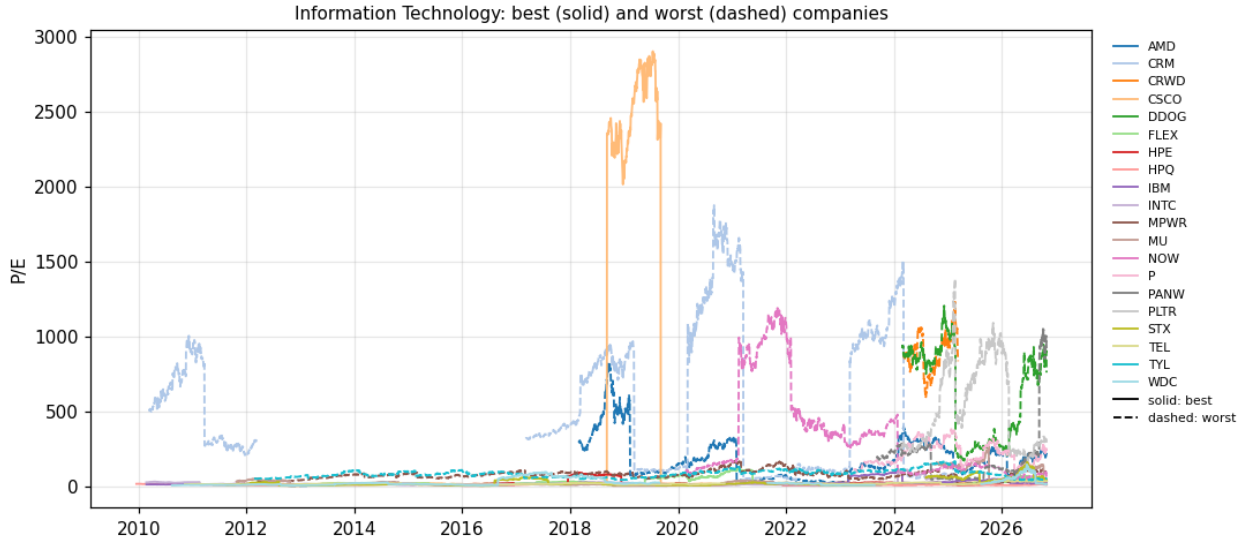

Figure 57: Information Technology: P/E of the 10 companies with the lowest (solid) and highest (dashed) median P/E over the full history.

E.8 Materials

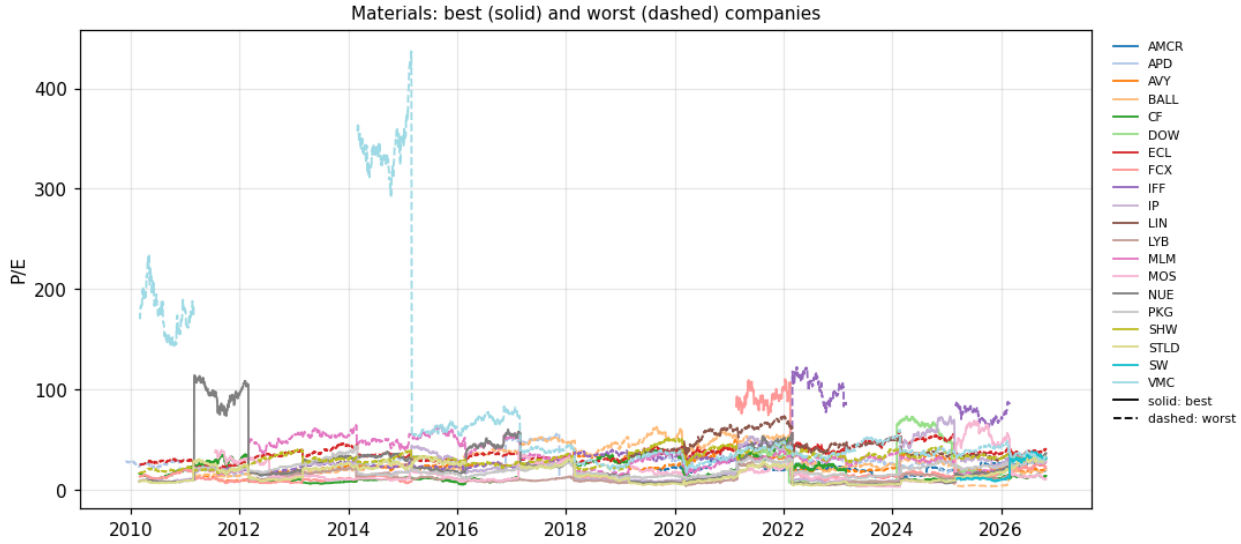

Figure 58: Materials: P/E of the 10 companies with the lowest (solid) and highest (dashed) median P/E over the full history.

E.9 Utilities

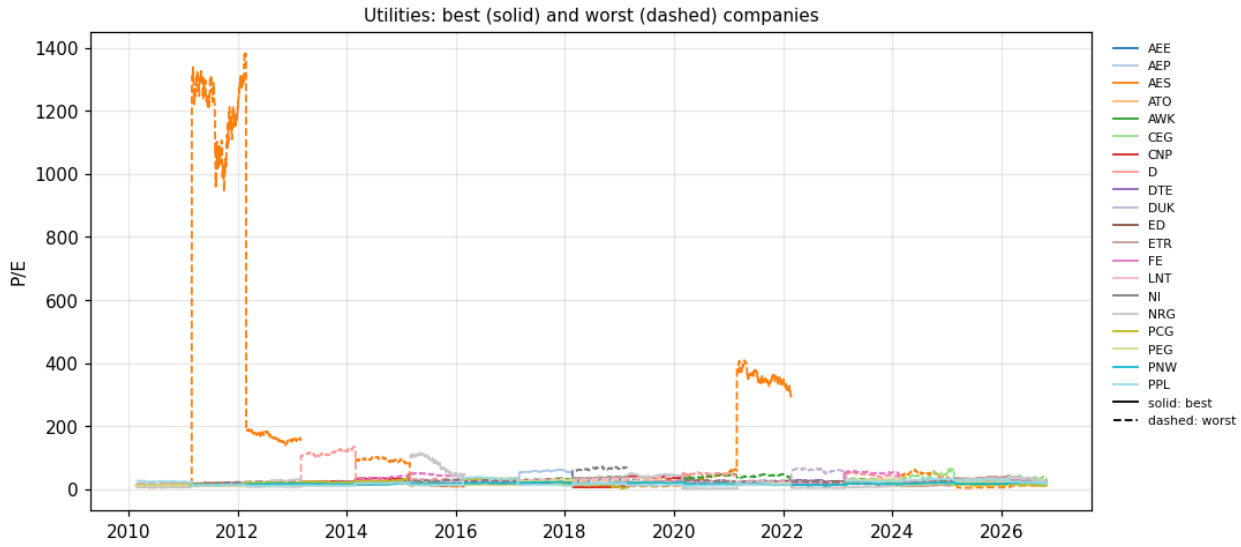

Figure 59: Utilities: P/E of the 10 companies with the lowest (solid) and highest (dashed) median P/E over the full history.

F Dividend yield: full history per sector

For every GICS sector, the trailing dividend yield of its companies with the highest (solid) and lowest (dashed) mean yield over the full history.

F.1 Communication Services

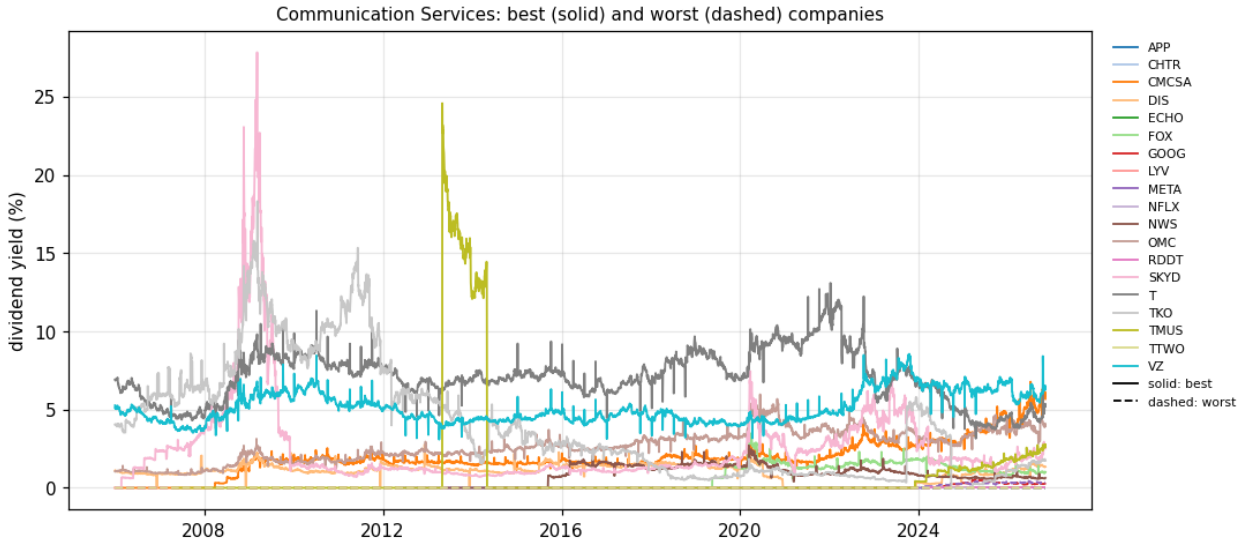

Figure 60: Communication Services: trailing dividend yield of the 10 companies with the highest (solid) and lowest (dashed) mean yield over the full history; percent.

F.2 Consumer Discretionary

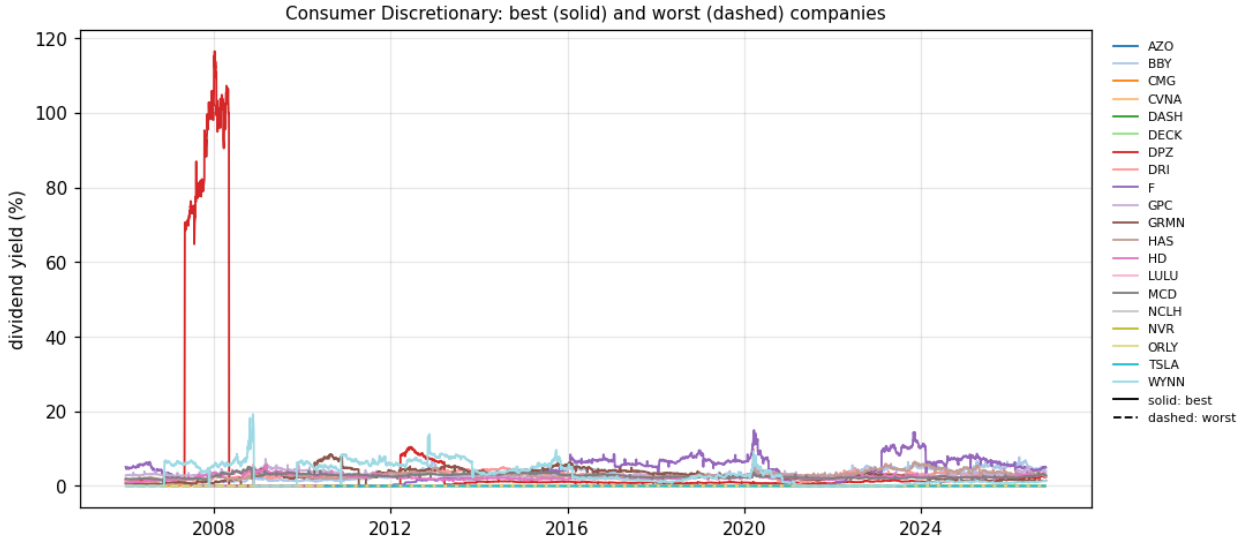

Figure 61: Consumer Discretionary: trailing dividend yield of the 10 companies with the highest (solid) and lowest (dashed) mean yield over the full history; percent.

F.3 Consumer Staples

Figure 62: Consumer Staples: trailing dividend yield of the 10 companies with the highest (solid) and lowest (dashed) mean yield over the full history; percent.

F.4 Energy

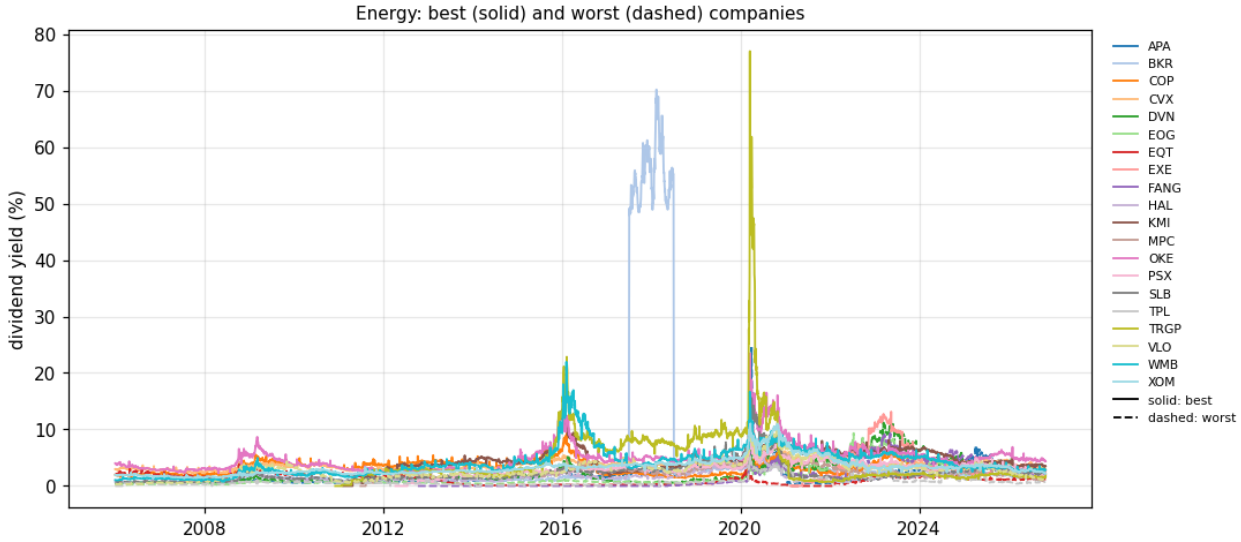

Figure 63: Energy: trailing dividend yield of the 10 companies with the highest (solid) and lowest (dashed) mean yield over the full history; percent.

F.5 Health Care

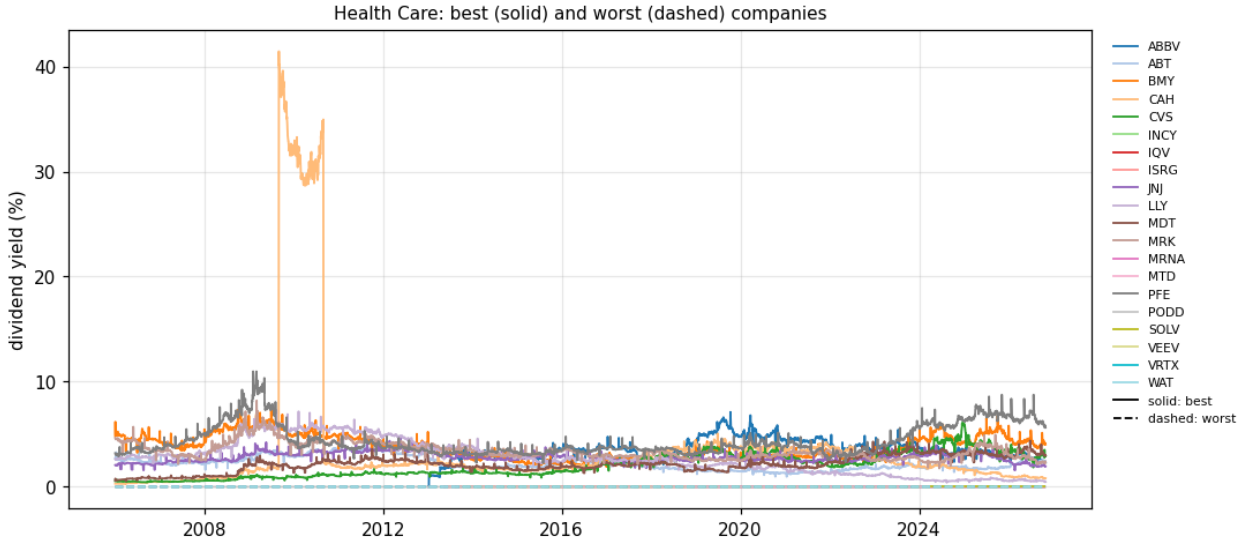

Figure 64: Health Care: trailing dividend yield of the 10 companies with the highest (solid) and lowest (dashed) mean yield over the full history; percent.

F.6 Industrials

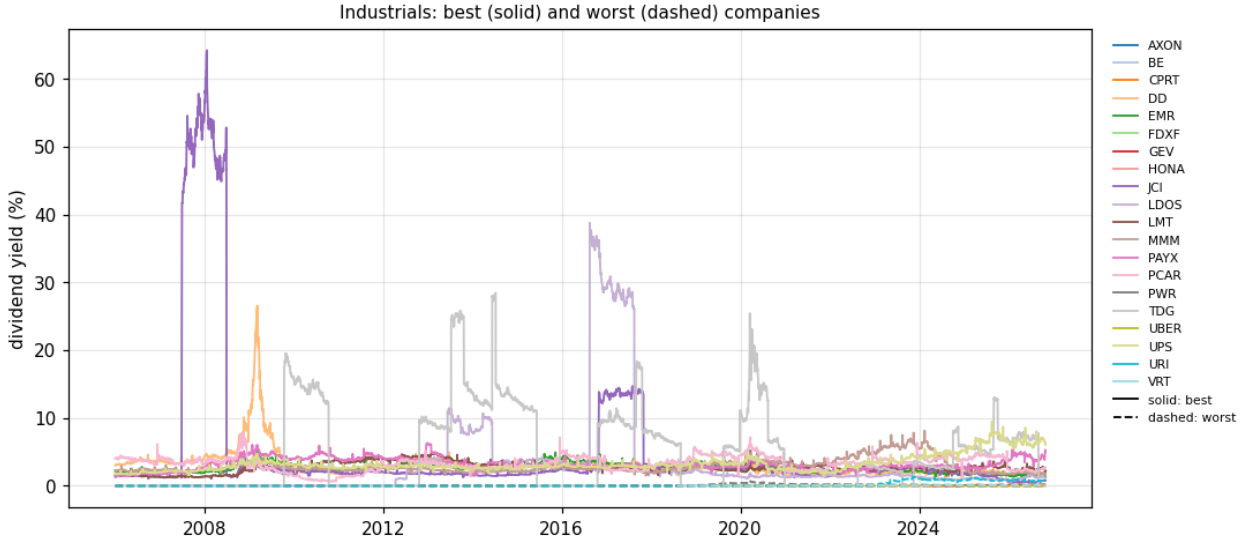

Figure 65: Industrials: trailing dividend yield of the 10 companies with the highest (solid) and lowest (dashed) mean yield over the full history; percent.

F.7 Information Technology

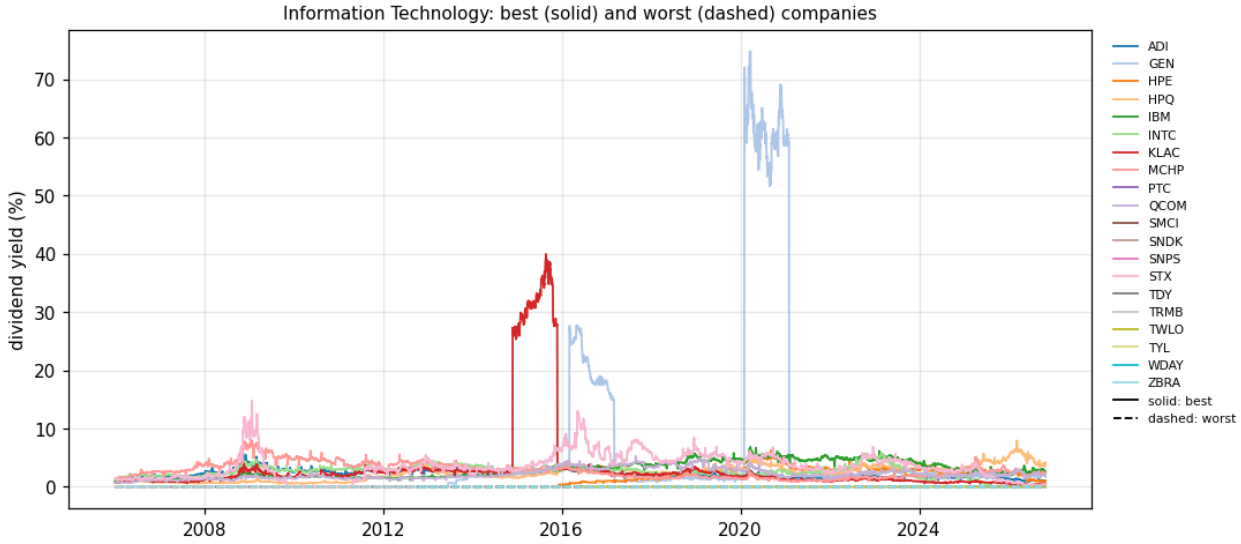

Figure 66: Information Technology: trailing dividend yield of the 10 companies with the highest (solid) and lowest (dashed) mean yield over the full history; percent.

F.8 Materials

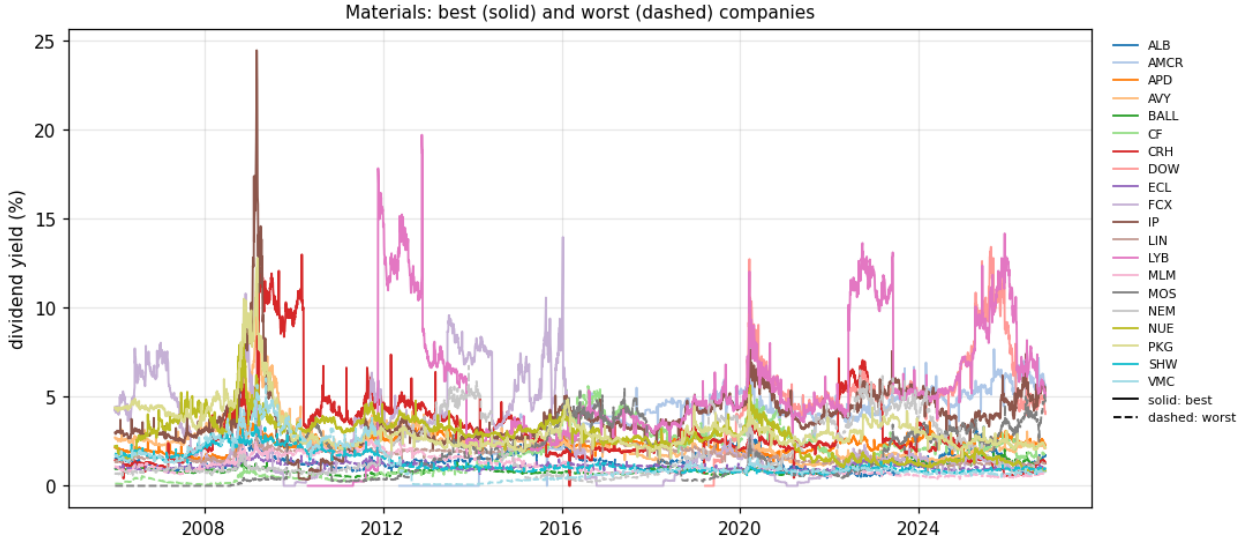

Figure 67: Materials: trailing dividend yield of the 10 companies with the highest (solid) and lowest (dashed) mean yield over the full history; percent.

F.9 Utilities

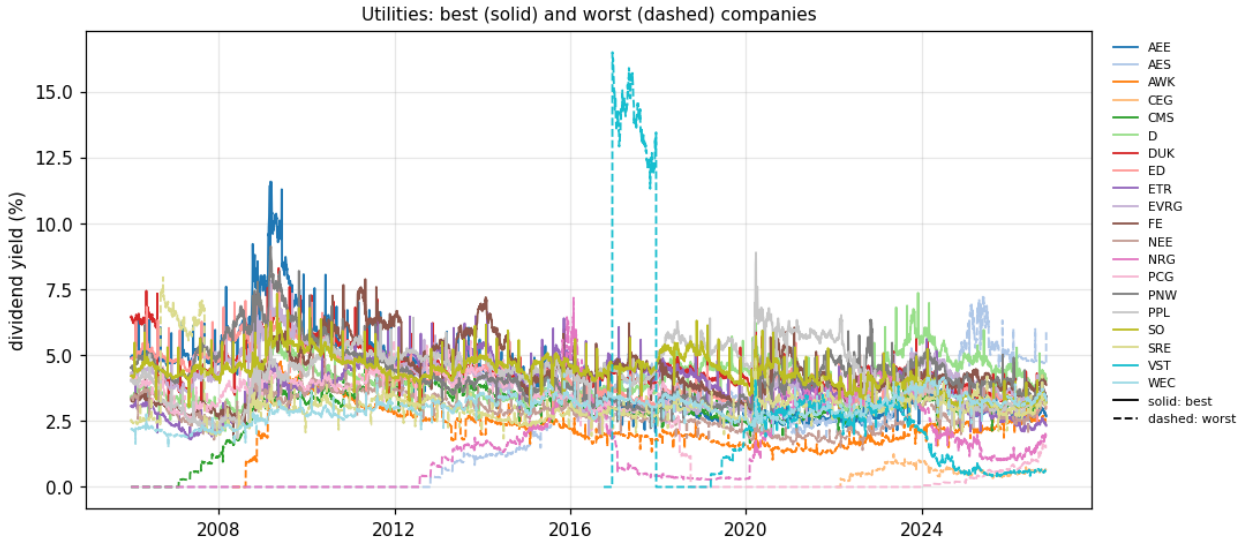

Figure 68: Utilities: trailing dividend yield of the 10 companies with the highest (solid) and lowest (dashed) mean yield over the full history; percent.

G Data checks

Checks of the data behind the report: how many companies report each field per year, whether reported EPS agrees with net income divided by diluted shares, how long after the period end filings arrive (the point-in-time delay), whether every symbol has a full trading calendar (youngest first, which shows each company's age in the data), and the exchange rate for ZAR figures.

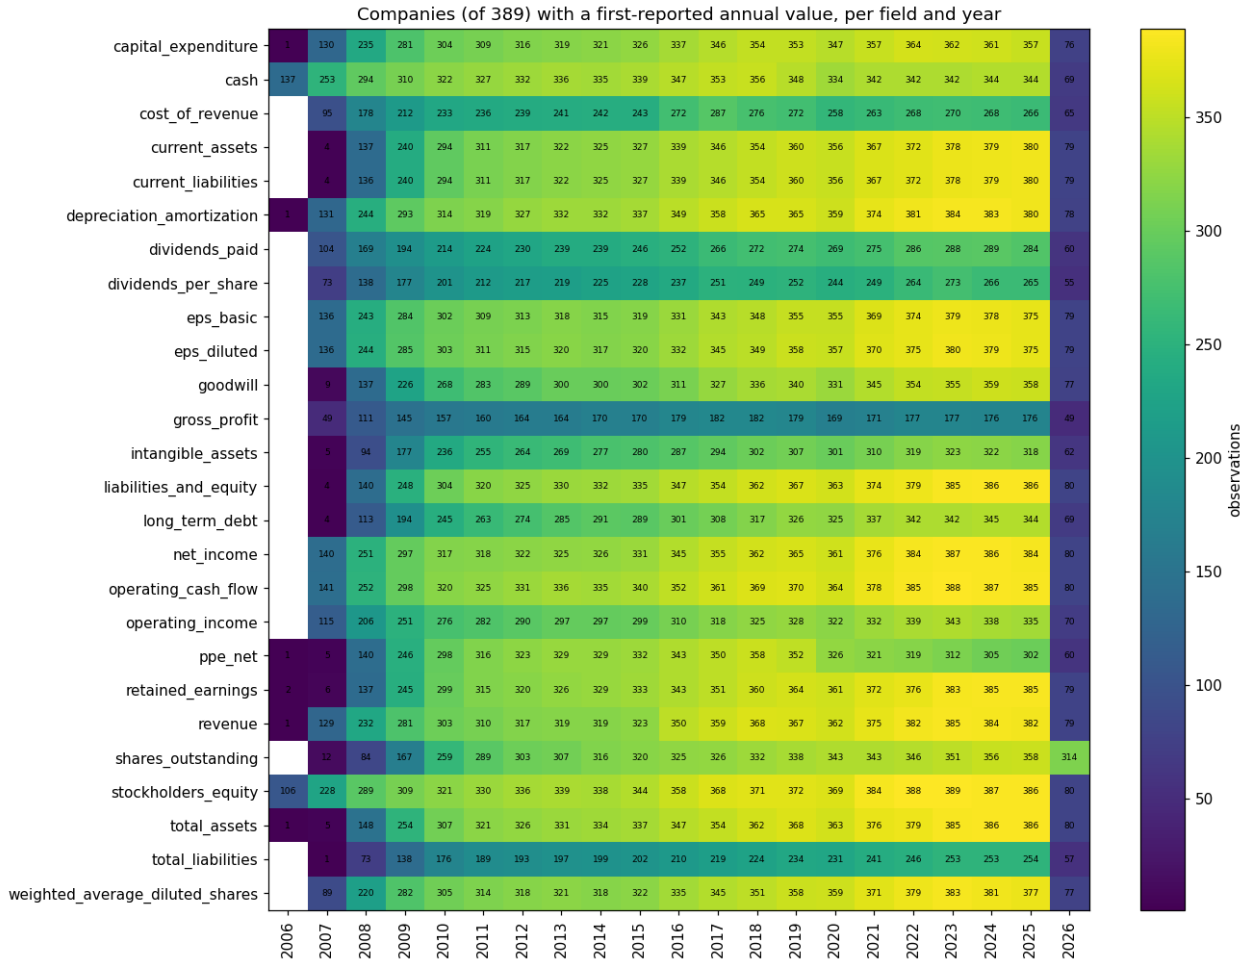

Figure 69: Number of companies with a first-reported annual value, per field and fiscal year.

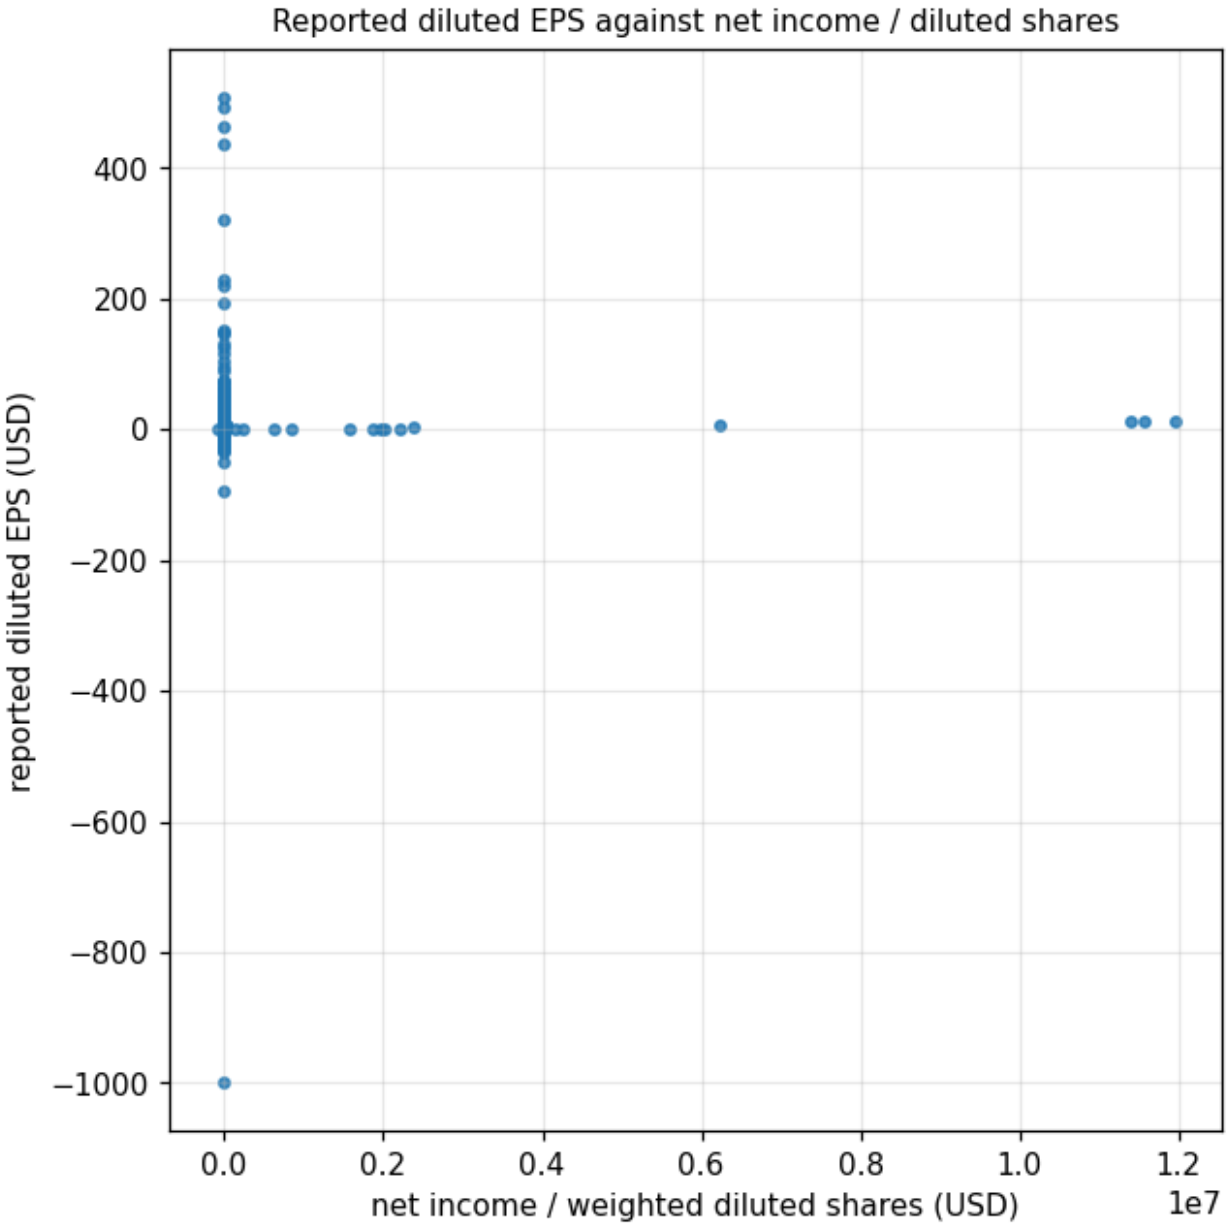

Figure 70: Reported diluted EPS against net income divided by weighted diluted shares, USD per share; points off the diagonal differ.

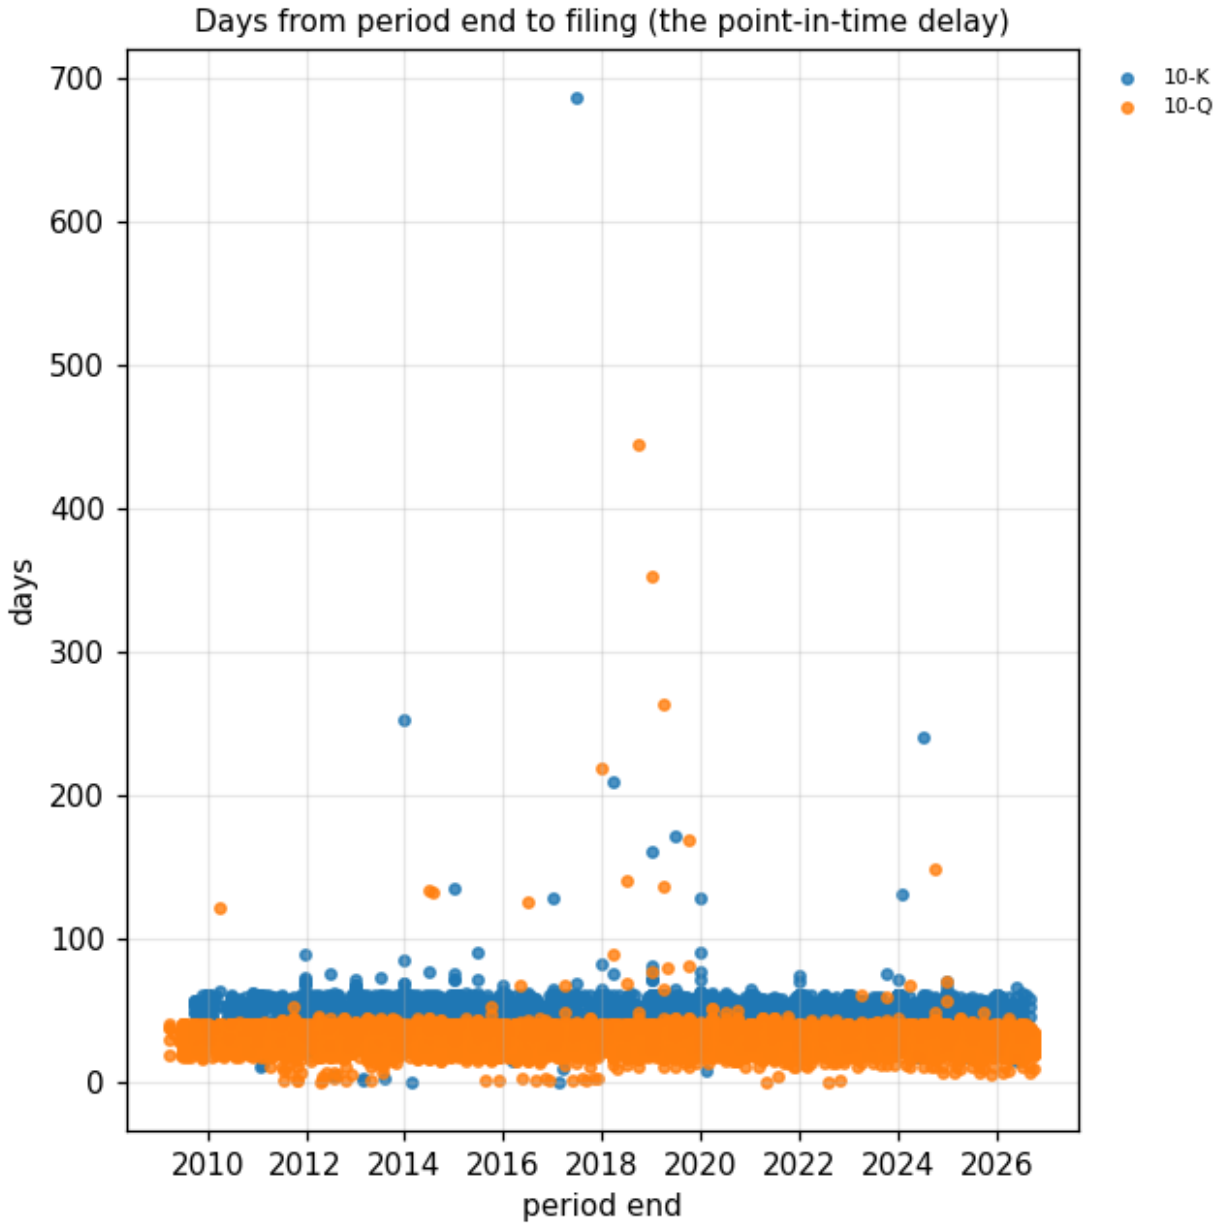

Figure 71: Days from period end to filing for each 10-K and 10-Q.
